Inclusion plates come in 110mm wide or 160mm wide assemblies and have shallow or deep penetration. Inclusion plate are fitted with wear plates. Wear plates can be easily replaced saving huge cost in material and time. Designed for the #9 shank and may suit any shank of any brand that has 22mm hole spacing's. Built from a highly wear resistant material. Comes standard with M12 bolts, washers and nuts.

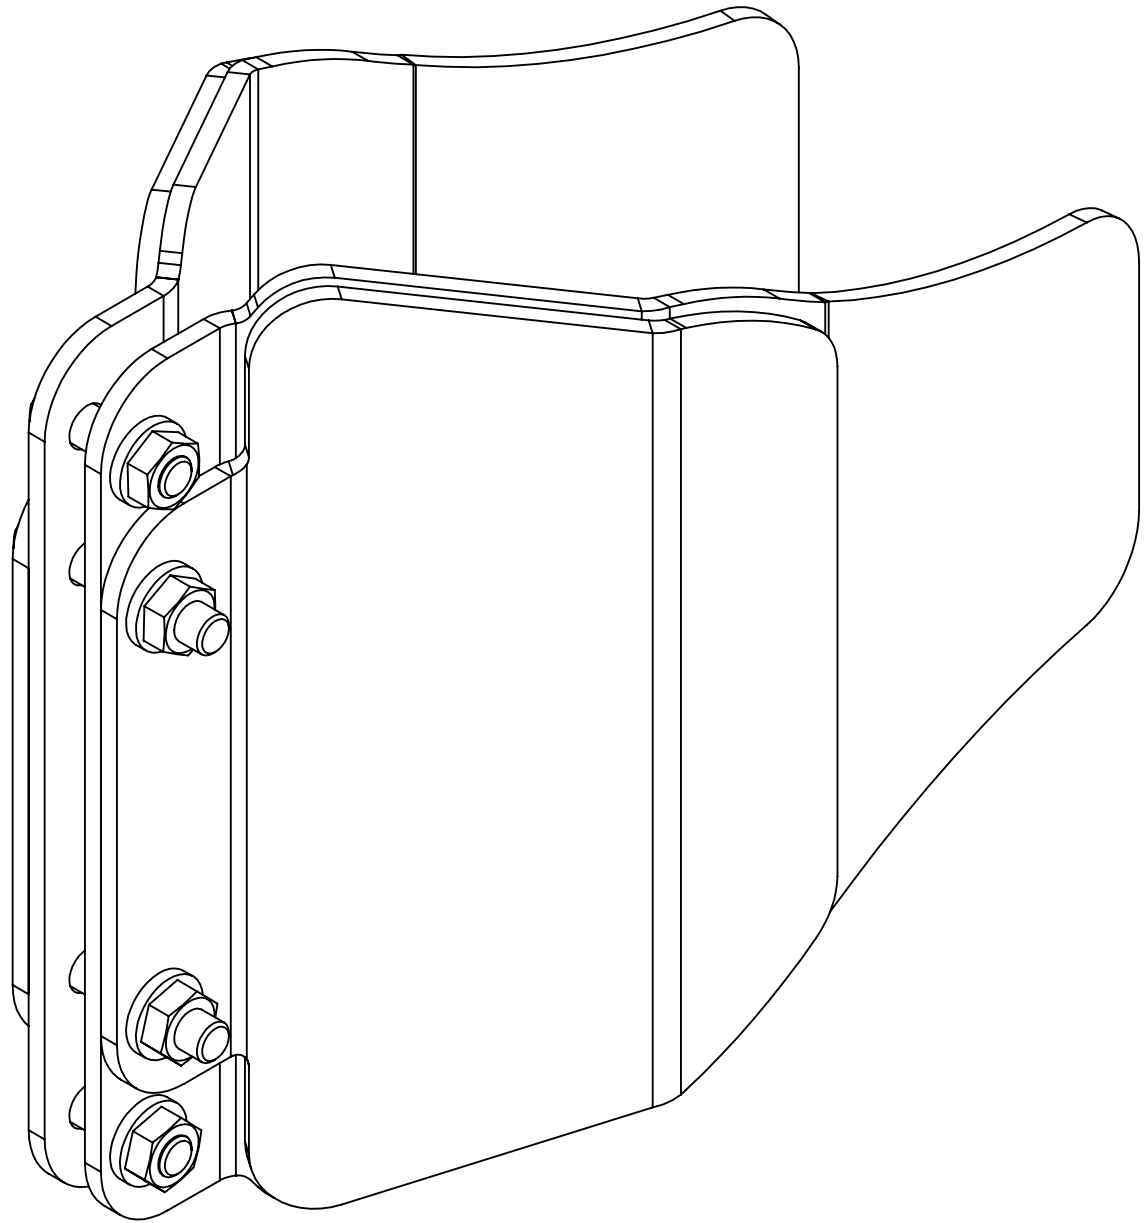

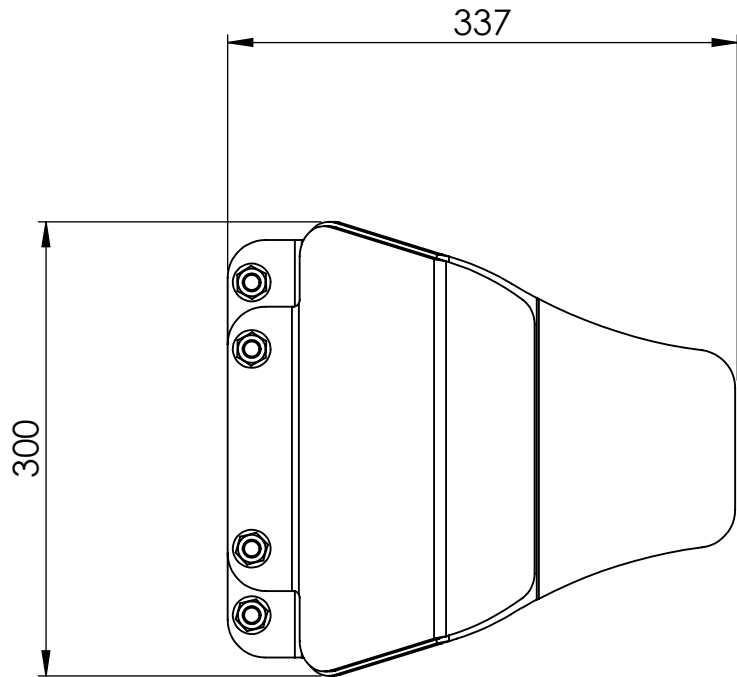

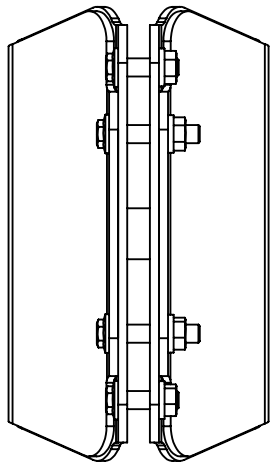

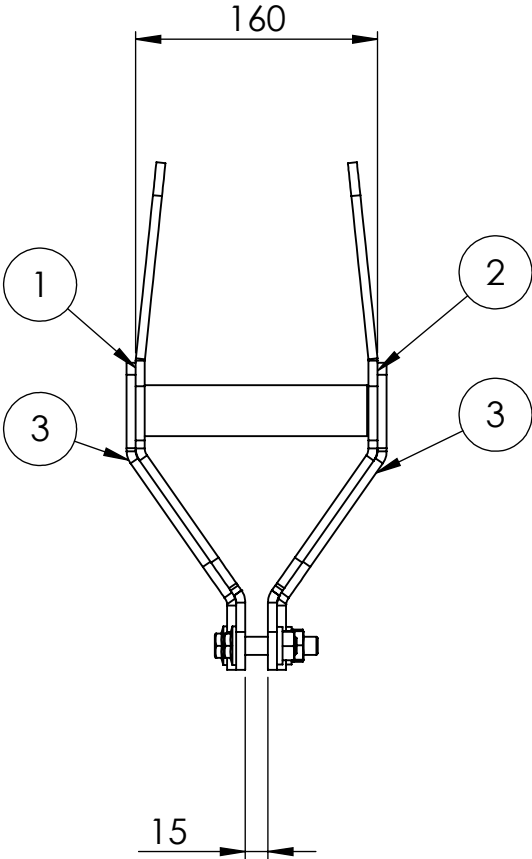

Inclusion plates will affect tractor draft requirements and recoil action. If attached to a non-standard plough (not an Agrowplow #9 Shank), plates and may clash with other components during recoil. Limitations may apply to placing 160 wide and/or deep inclusion plates on shanks in the front row of a plough, check shank clearance during recoil for suitability.
