

AUTOMATION NEVER LOOKED SO GOOD

Take a Look at What Tangentia RPA Can Do for You

ROBOTIC PROCESS AUTOMATION (RPA) IS ADVANCED AUTOMATION SOFTWARE THAT CAN REVOLUTIONIZE THE WAY YOU OPERATE YOUR FRONT-OFFICE AND BACK-OFFICE PROCESSES. BY AUTOMATING RULE-BASED, REPETITIOUS TASKS THAT TAKE HUNDREDS OF HUMAN HOURS TO COMPLETE AND ARE PRONE TO HUMAN ERROR, YOU WILL TRANSFORM YOUR OPERATIONS.

With RPA you can:

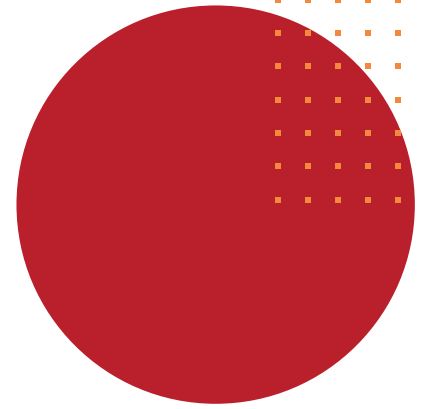

- Streamline front-office and back-office processes
- Free up employees to perform more high-value work
- Increase customer and employee satisfaction
- Reduce costs and increase productivity and efficiency
- Ensure compliance with a solution that is tailored to your compliance policies
- Stay agile to remain competitive in your industry
- Provide remote support for your business

RPA is an automation solution that works across departments in a variety of industries, including:

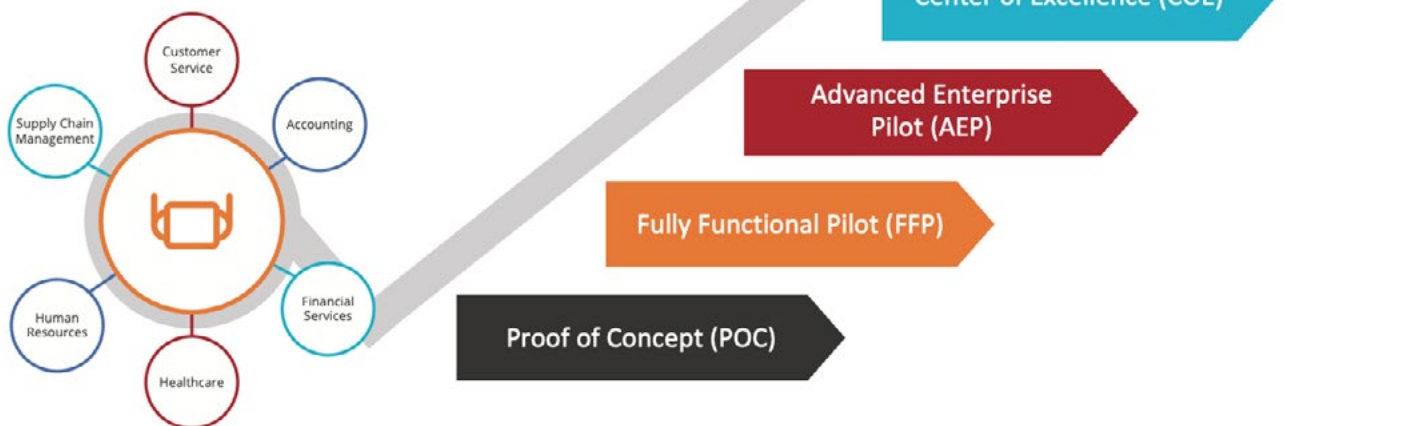

- Automotive
- Oil & Gas
- Banking & Finance
- Retail
- Insurance
- Education
- Health Care
- Nursing

The Tangentia RPA Journey

The Tangentia RPA journey is designed to support you through every step of the RPA adoption and integration process, from proof of concept all the way through Enterprise roll-out.

Whether attended bots complementing human workers and increasing their efficiency or unattended bots and artificial intelligence that take the place of a human worker who can move on to creative and collaborative tasks, we aim to be **your chosen partner** by bringing the power of Automation to your enterprise.

We've Got You Covered

AT TANGENTIA, WE KNOW IT CAN BE OVERWHELMING WHEN GETTING STARTED WITH AUTOMATION. SO, WE HAVE CREATED A SERIES OF STARTER PACKS TO MAKE IT EASY FOR YOU. EACH OF THESE SOLUTIONS WILL COME WITH THE FOLLOWING SERVICES:

- Detailed requirements gathering and analysis of the As-Is and To-Be processes to determine best possible use of RPA in organization
- Recommendations for process improvements and best possible ROI
- Requirements documentation and submission of the documentation for client signoff
- Procurement of Robotic Process Automation Software Licenses
- Installation and setup of the software in environments (Staging & Prod)
- Development (creation of Bots including re-usable task bots for sub-processes) and internal testing
- User Acceptance Testing (UAT) in testing / staging environment with client signoff
- Deployment of Bots in production environment
- Hypercare (warranty) and monitoring
- Training, Documentation & Knowledge transfer to the customer's team
- Ongoing annual support services
