

Cleo EDI/B2B Integration Partner

Seamless end-to-end integration with your trading partners, customers, and suppliers

Tangentia is a proud partner and Value Added Reseller (VAR) of Cleo. We offer system implementations, integrations, and professional services for the Cleo software stack.

Cleo + Tangentia Business Benefits

Simplify Complex Flows

Cleo's no-code, visual flow designer allows complex data flows to be defined and set up in minutes. It facilitates the flow of data between applications without the use of SQL. Mapping and transformation capabilities are consumer-friendly and accessible, meaning they can be set up using a simple drag and drop interface. With more than 800 pre-configured connections, businesses can connect to popular trading networks immediately, including Walmart, Target, Food Lion, Home Depot, Honda, and many more.

Integrated and Automated Processes

Cleo provides a rich set of connectors and intuitive installation wizards that accelerates integration with popular business applications, like SAP, JD Edwards, Salesforce, and Netsuite. Discover a broad range of automation capabilities that allows users to schedule tasks or configure actions to be performed as triggered by users.

Complete Visibility

Cleo provides heightened manageability, visibility, and traceability for various activities, such as web requests, incoming and outgoing files, and application-level errors. These detailed logging capabilities provide transparency to all activities being performed by the system, accountability across stakeholders, and allows the users to correct the errors as needed by the business.

What is Cleo?

Cleo empowers organizations to deliver business outcomes through a fresh approach to B2B integration. With a broad range of applications, including modern Managed File Transfer (MFT) and Electronic Data Integration (EDI) solutions that are scalable, powerful, and integrate with your back-office.

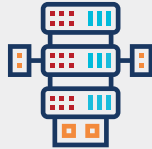

Cleo provides automation for processes that are critical to key business functions, secure messaging capabilities, and interactive mapping and translation capabilities across different industry standards and requirements.

Cleo Solutions

Cleo Lexicom

Cleo LexiCom provides robust support for most protocols on the market. This solution offers quick and easy installation and heightened manageability and visibility—all out of the box—for your immediate and future secure file transfer needs.

This solution has more than 800 pre-configured connections, allowing businesses to connect to popular trading networks immediately, including Walmart, Target, Food Lion, Home Depot, Honda, and many more. Cleo LexiCom leverages existing technology, including EDI translators, operating systems, and IT infrastructures to guarantee you've optimized your resources.

Cleo Clarify

Cleo Clarify is an any-to-any data transformation and orchestration platform that enables companies to scale to support a wide variety of business integration requirements without the need for additional coding.

This solution lets businesses transform EDI, XML, Spreadsheets, Flat Files, and other non-EDI data into any other format for ingestion by on-premise and cloud applications.

Cleo Clarify accelerates integration with popular business applications, like SAP, JD Edwards, Salesforce, and Netsuite with a rich set of connectors and intuitive installation wizards.

Cleo Harmony

Cleo Harmony provides companies with an intuitive and scalable solution to consolidate and streamline any integration process, while easily adding connections to grow the business.

This solution allows for reliable and scalable data communications with the control, governance, and security you need for your internal and external exchanges. Cleo Harmony enables seamless information hand-off to other critical processes, including data transformation and orchestration, providing a real-time integration experience.
