

# Stop giving cyber attackers easy access to your business...

With **10-15% of phishing attacks** making it through your filters, discover 5 reasons your team needs **Managed Secure Business Internet (MSBI) in 2022.**

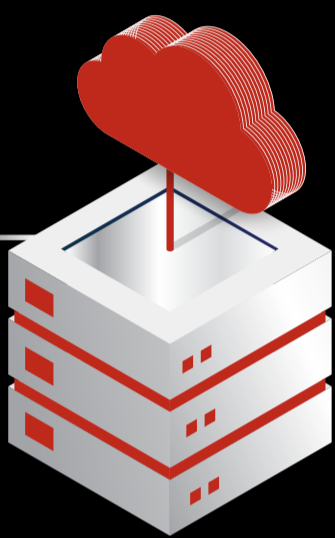

**Business Email Compromise (CEO Fraud) is a \$26 billion scam.**

- Minimize threats by integrating advanced security measures and monitored business internet with scalable network security features using MSBI.

**91% of successful data breaches start with a spear-phishing attack.**

- MSBI's scalable Unified Threat Management (UTM), including web filtering, IPS, antivirus, antispam, and application control, helps employees avoid attacks.

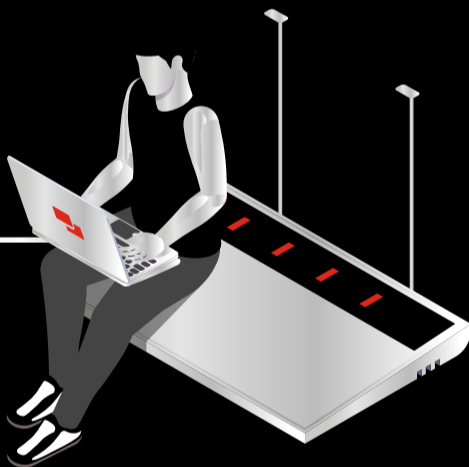

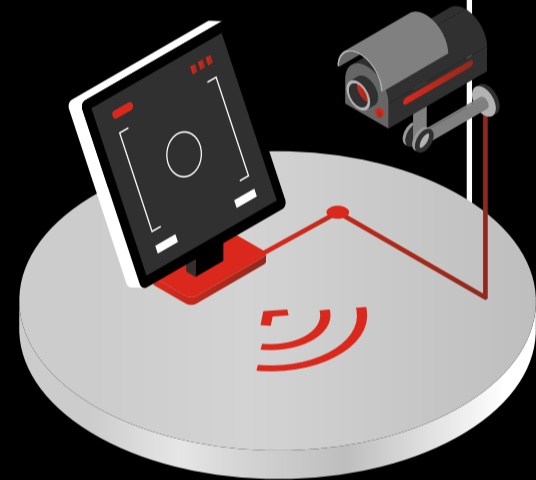

**34% of businesses hit with malware take a week or more to regain access to their data.**

- Mitigate the risk of unauthorized access to critical actionable intelligence and impact of vulnerabilities using our team of certified cybersecurity experts.

**In 2020, the FBI received a record-breaking 791,790 cybercrime complaints, with an estimated \$4.2 billion in losses.**

- Deter threats with information security risk management using a centralized platform managed by a 450-person expert Security Operations Center (SOC) team.

**75% of companies infected with ransomware are running up-to-date endpoint protection.**

- Add next-generation firewall protection along, single point of contact, and a 24/7 Network Operations Center (NOC) for extra security layers using Managed Secure Business Internet.

## Scale your security to your business

Managed Secure Business Internet from Claro Enterprise Solutions helps minimize cyber threats by offering customizable layers of security that integrate features including 24/7 NOC and SOC, Next-Generation Firewall Protection, scalable UTM, and wireless failover for higher availability.
