

SAFETY MONITORING

Leverage the power of artificial intelligence (AI) to reduce risk on jobsites and projects. Like a “virtual safety inspector” our safety monitoring solution automatically detects safety hazards on jobsites.

HOW IT WORKS:

- Aggregate all project photos with pre-built integrations
- Automatically detect safety hazards such as PPE, fall protection and housekeeping
- Alert safety managers and project teams to take corrective actions
- Predict and avoid incidents saving an estimated \$1.4M-\$3.6M per year

- Automatically generate metrics on leading indicators of risk for every jobsite
- Objectively measure compliance to critical safety policies
- Identify trends across all projects to focus management attention
- Save money on insurance and claims
- Integrates to Procore, Autodesk BIM 360, Box, OxBlue and other systems in less than 90 seconds

Compliance: PPE

PROJECT	HARD HAT	HARD VIS	GLOVES	GLASSES	AVERAGE
5418 Raynor Green	98%	93%	79%	100%	93%
114 Champlin Inlet	97%	61%	71%	19%	62%
69 Kuhn Tunnel	97%	98%	95%	99%	97%
AVERAGE BY TAG	97%	91%	91%	97%	84%
