# SMARTVID.IO

Minimize risk across all of your projects with safety observations, safety monitoring and predictive analytics while aggregating all sources of photo and video content into one system powered by AI.

SAFETY OBSERVATIONS
Implement observation-based safety with an easy-to-use mobile and web system for the entire company.

SAFETY MONITORING
Automatically detect unsafe conditions and behaviors with Vinnie the construction-trained AI engine.

PREDICTIVE ANALYTICS
Proactively identify high risk projects to intervene before problems occur.

ENTERPRISE PHOTO & VIDEO MANAGEMENT
Aggregate and search all photo and video data across the company.

"There is a demonstrable opportunity to control hazards and improve safety performance by deploying resources to those sites where elevated risk is predicted."
— Alex Hall, Executive Vice President, Suffolk Business Systems

Suffolk

SMARTVID.IO

How We Reduce Risk

RISK EXECUTIVES

Measure trends to identify risky projects and focus team attention.

SAFETY MANAGERS

Automatically detect safety hazards, measure KPIs, and drive behavior.

PROJECT TEAMS

Capture field observations 3x faster and lower incident rates.

IT / ADMINISTRATORS

Implement a company-wide platform so visual project data is easily retrieved and never lost.

"Historically, safety has been very reactive, and if we can get to proactive, we can get to that place of true prevention."
— **Les Hiscoe, CEO**

SHAWMUT

ABOUT SMARTVID.IO

Smartvid.io significantly reduces jobsite risk with the best of human and artificial intelligence.
