FRESH FROM THE FIELD...

When fourth generation cattle producer, Ed Moorhead was looking for a solution to spray his hilly elevated country with accuracy, it was the LS1000 fitted with 12 metre Super-X boom and TeeJet 844E Controller that enabled him to get the job done. With its strength, durability and accurate application, it was exactly what Ed was looking for to service his 3,500 acres at the top of the Great Dividing Range at Ben Lomond, NSW.

"Some of our country is steep and rocky, we required a sprayer that could handle the hard conditions. The boom is tougher than anything we've had in the past and I've recommended it to others in the area because of this." Ease of use and spray accuracy were also important considerations for Ed. "The chemical induction hopper properly mixes the chemical and is easy to fill at ground height. Chemical is expensive so we don't want to waste it. The auto-rate control has been really important for weed control in the large areas we're spraying and taking out weeds in sensitive permanent pastures. The unit lets us do all that from inside the cab very quickly and easily" he says. After four years of trouble-free spraying in some of Northern New South Wales' roughest terrain, Ed has a great spraying set up and the service of BA Pumps and Sprayers behind him.

PROUDLY LOCALLY MADE FOR OVER 30 YEARS

"Price is what you pay. Value is what you get." – Warren Buffett

This has been our guiding philosophy over the last 30 years. All our sprayers are designed inhouse and manufactured from the ground up in Cambridge, New Zealand and Geelong, Australia. We believe our continued dedication to manufacturing locally, along with a focus on quality, strength and innovation guarantees our customers value for money and a sprayer that exceeds their expectations for years to come.
