

Merchant Acquiring System

OnBo-MAS: An OnBo configurable solution

www.idmission.com

Onboard Merchants in Real time

Digital, Mobile, Omnichannel

Eliminate abandonment. Onboard new merchants in minutes without sacrificing your risk goals. Traditional brick and mortar locations, MOTO (Mail Order/Telephone Order) transactions, Internet transactions and shopping carts; Whether it's a straight through process or more complex processes to verify high-risk merchants you'll be able to make decisions in real-time.

Agile, Responsive, Compliant

No-Code platform enables rapid changes to meet risk and compliance needs

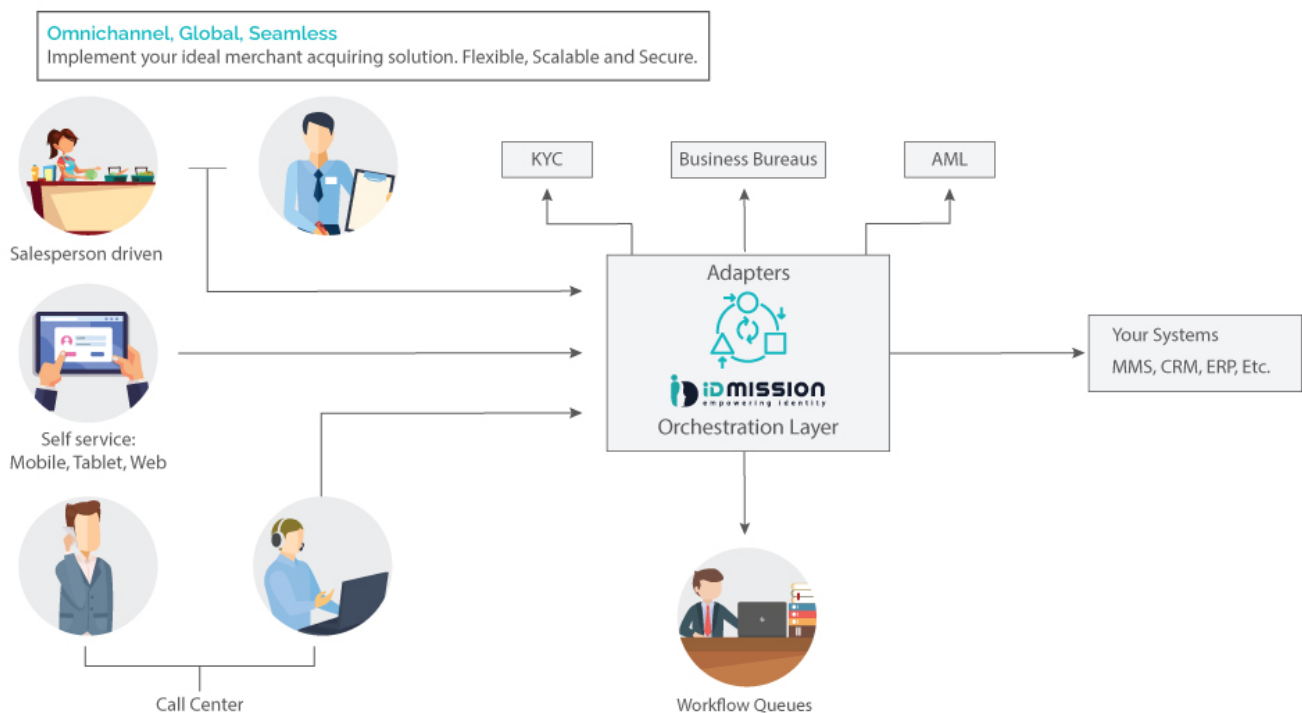

Our NO-CODE platform puts your risk team in control. A drag and drop interface empowers your business users to quickly and easily create, adjust, and deploy merchant risk management processes, from implementing risk models to adjusting process components. You'll have the agility to quickly respond to new threats and take advantage of new market opportunities, making your business more competitive.

Comprehensive Risk, AML KYC

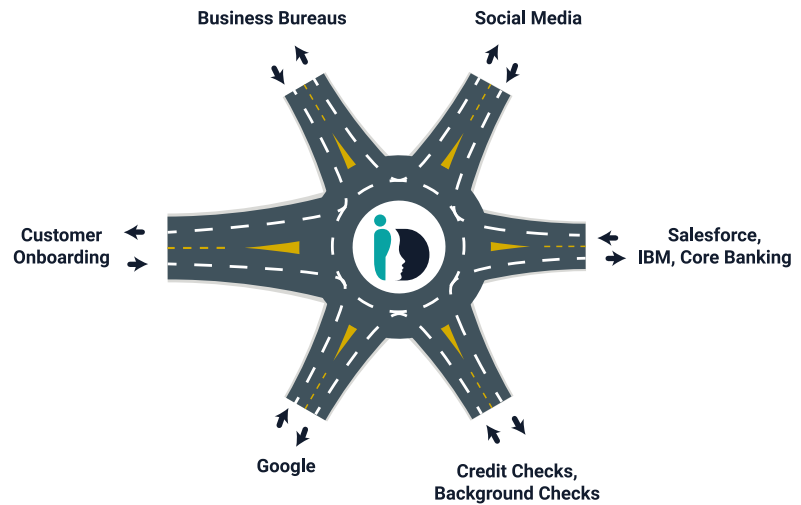

Built in Identity proofing, and decisioning. Connected to Service Providers for KYC, AML integration.

Automated ID document and Identity proofing is built in. As is a comprehensive decisioning engine that provides decisions including data from any number of 3rd party repositories. Platform comes with a workflow engine that enables creation and execution of complex automated and/or manual business processes.
