

Costpoint Contract Management

Costpoint Contract Management allows you to easily track financial and non-financial contract activities, FAR/DFARS clauses, modifications, supplements, and provisions during the pre- or post-award process. Uniquely integrated with GovWin IQ, the system helps reduce data entry, automates the management and administration of government contracts and provides the contract manager a simplified and streamlined solution for managing contracts.

Benefits Include:

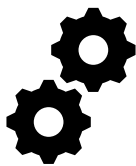

Contract Lifecycle Management – One system from opportunity, to contract and project. Enter data and automate flow for better data integrity and time savings.

Seamless Subcontract Management – Reduce data entry and flowdown FAR/DFARS clauses. Ensure awareness of exclusions list vendors with built-in CPSR support.

Simplify Data Calls – Integrated contract management provides real-time tracking of data for contracts & procurement teams.

PCI's Contract Management implementation includes:

Configuration

PCI will setup the system for your company requirements. We will train your team on how to update the configuration.

Training

Personal Interactive Training on all modules.

Data Loading

We can load your data, if required.

Reports

PCI can customize reports, via MS Word or COGNOS.
