Container Tracking by Magaya

Freight and cargo tracking made easy

Worry-free container tracking software

Container Tracking takes the worry out of tracking your shipment.

You can rest assured with easy access to important information regarding the different stages of the logistics and transportation process, including all the details of the status changes of the container.

The solution enables global monitoring of your ocean container numbers, delivering better control and freight management as your shipments move from origin to destination.

FEATURES

- Eliminate wasted time and manual processes with just one click to track all your containers worldwide.

- Provide status updates via events in the Magaya shipments, Magaya Digital Freight Portal and the LiveTrack Mobile App by Magaya

- Monitor the different stages of the logistics and transportation process, including details of the status changes of the container.

BENEFITS

Real-Time Visibility

Gain real-time and direct visibility of your containers from the Magaya platform, wherever they are in the world.

Mobile Convenience

Provide 24/7 self-serve visibility for your clients when you share your containers' status updates as events in the LiveTrack Mobile App by Magaya.
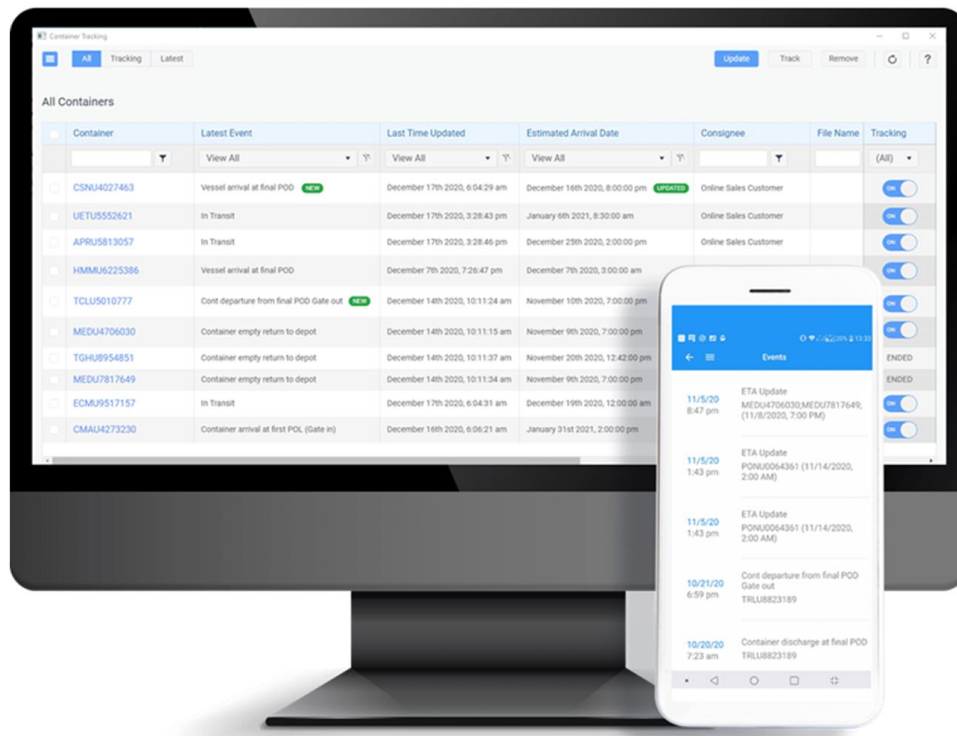

Boosts Efficiency

Acquire quick access to the status of your containers by linking container information in your shipments to container tracking sources worldwide.

More than 100 Carriers

Access more than 100 ocean carriers such as Evergreen, CMA, and many more to easily track your ocean shipments. New ocean carriers are added to the extension all the time.

Tracking ocean shipments can be a daunting task, as containers become harder to track once they leave a port. Plus, if one of your shipments does not reach its intended destination, it's even more nerve-wracking when you lack visibility into its whereabouts. Magaya Container Tracking eases your worries and simplifies tracking and customer service processes with robust functionality, including:

ONE-CLICK TRACKING
- You only need the container number
- Auto search SCAC code
- Track containers in batch
- Easily search containers in the grid

UPDATED ANYTIME WITH EVENTS
- New events definitions are auto-created
- Events messages grouped by containers
- No need to open the extension to receive updates
- Daily automatic updates

SHARE INFORMATION EASILY
- Events messages grouped by containers
- Push notifications to the LiveTrack Mobile App by Magaya
