

Magaya Digital Freight Portal

Freight customer experience and execution software

Your entire digital freight business in a single solution

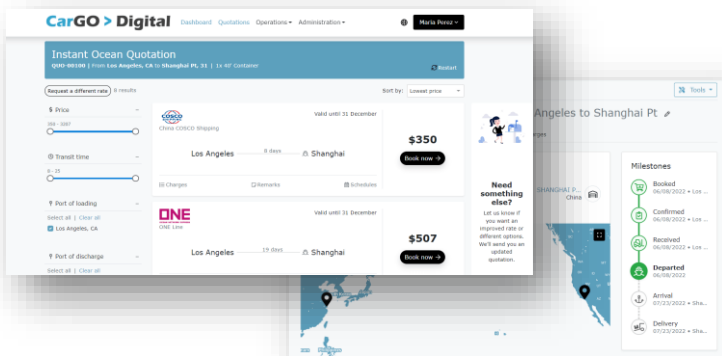

Magaya gets you quickly established as a digital freight forwarder with its Digital Freight Portal. A completely branded and customized customer-facing portal for your business.

Your customers will love the added visibility and control they get with easy self-service access to quotes, schedules, bookings, shipments, tracking, and reporting.

You'll benefit from streamlined processes, improved productivity, and reduced costs, enabling your team to:

- Respond to an RFQ with an offer from within the portal
- Manage schedules to provide customers with the next available departures for easy booking
- Follow up on shipments collaboratively with customers, including file sharing and digital archive
- Identify the best rates per trade lane
- Manage margins and provide customized pricing
- Provide customers with 24/7 access to inventory, warehouse receipts, cargo releases, shipments, purchase orders, invoices, and more

It's a must-have solution for modern freight forwarding.

A fully customizable customer-facing portal representing your brand - from colors, to media, and content

BENEFITS

Boosts Productivity

Automate many of the repetitive tasks related to the sales cycle, freeing your team's time to generate new business and work on strategic growth initiatives.

Modernizes the Customer Experience

Provide your customers with an immersive digital experience from quote to booking and beyond, complete with full tracking visibility and reporting all from a custom-branded digital portal.

Enhances Flexibility

As part of the Magaya Digital Freight Platform, you can enjoy a single source of the truth while automating and digitizing your business. Plus, its flexible API allows you to also connect it to the ERP system of your choice.

Streamlines Rate Management

Manage and analyze your global buying tariffs, pull direct carrier integrations for contract and spot rates, view and apply surcharges, free time, future GRIs and more with seamless integration with Magaya Rate Management.

Strengthens Your Brand Presence

Gain complete control over your branding with a white-labeled portal. From colors, to media, to content, we give you the tools to fully leverage your brand, complete with single sign-on.

FEATURES

QUOTATIONS

Customers can quote instantly from your portal

- Spot and contract rates
- Multiple or single pricing options per trade lane
- Differentiate per product
- Save prices into a formalized quote that can be shared with colleagues

SCHEDULES

Complex multimodal, multileg routes are no problem

- Simple and clear design highlighting the most important calls to action
- Convert a schedule into a booking or save it for later
- Google Maps interface to display routing options graphically

BOOKINGS

Customers can book based on their quote

- Start from a quote, schedule, or copy a previous booking to save time inputting details
- Save bookings as drafts
- Bookings are sent to Magaya Supply Chain or the TMS/ERP of your choice

WAREHOUSE VISIBILITY

Customers can view and manage warehouse inventory*

- View warehouse receipts
- View and create cargo releases and pickup orders
- Build and save detailed pickup order, warehouse receipt, cargo release and inventory reports that can be downloaded via Excel
- Leverage the cargo detail report to search by part number and filter by PO number, invoice number, status, etc.

* When used in conjunction with Magaya Supply Chain.

SHIPMENTS

Customers have a full view of running shipments with you

- Keep up to date with customizable milestones
- Manage documents and conversations with your vendors directly from the shipment
- Users can also receive emails and in-app notifications

TRACKING & VISIBILITY

Shipments are visible to customers in real time

- AIS vessel positions for shipments underway
- Configurable push notifications
- Save time with fewer customer inquiries
- Keep customers apprised on the status of their cargo on any mobile device with the LiveTrack Mobile App by Magaya

REPORTING

Customers can build, download, and even schedule their own reports for all transactions with you

- Easy report builder
- Download and schedule reports
- Reports can be sent by email

PURCHASE ORDERS

Customers can create purchase orders online

- All PO functionalities are online for easy access
- Set up direct system integration for easy PO output
- Turn POs into Shipments easily
- Full archive and template function for all Pos

PAYMENTS & INVOICING

Customers can pay invoices online*

- View invoices list including the invoice number, date, and amount
- Use the Veem payment platform which accepts credit card or ACH payments from several countries and in multiple currencies
- When a payment is received using Veem, it will be sent to Magaya Supply Chain and linked to the invoice automatically
