

Dimensioner by Magaya

Automate your warehouse and boost your profits

How much money are you leaving on the table each day due to inaccurate dims?

When it comes to warehouse operations, accuracy is everything. You wouldn't be satisfied if your inventory was off, even by a small margin. The same should go for your weights and measures.

Dimensioner by Magaya turbocharges your warehouse with cutting-edge warehouse automation, saving time and money, and getting pallet measurements right, the first time and every time.

Seize complete control of your shipping costs and revenue by accurately and automatically measuring dimensions of packages and instantly saving them, complete with photos, to your Magaya system or current WMS.

Dimensioner provides accurate data in an instant that can automatically be shared with most software systems, making your job easier and more profitable. That leads to increased profits, improved efficiency, and faster warehouse processes.

"We went from processing 150 boxes per day to over 500 with our parcel Dimensioner and Binder. Our operation is unique where we have to open each box and take a picture of its contents. The Dimensioner and Binder combination has allowed us to accelerate our operations and keep up with the inbound volumes."

REAL RESULTS

Increased Annual Revenue by 15%

Dimensioner boosts revenues fast, allowing you to charge accurately and reduce the number of chargebacks due to increased accuracy and photo evidence.

Improved Productivity by 96%

Measuring every dimension of a pallet with a tape measure is a tedious, time consuming, costly, and error-prone process that Dimensioner automates in a flash.

Reduced \$40 of Lost Revenue on Average for Every Pallet

Rounding errors associated with getting dims by hand are eroding your profits. Dimensioner delivers the precise measurements you need to charge your customers accurately.

Reduced Data Entry Time by 10%

Taking and downloading photos, attaching them to the right records in the system, and inputting dimensions manually takes far more time than it should. Get back to productive work by letting Dimensioner automate it all.

EASY, EXPERT INSTALLATION

Low Upfront Costs

The Dimensioner is offered as a Device as a Service (DaaS) model, keeping your upfront costs low and leaving the technical legwork to the Magaya experts.

CONNECTS WITH YOUR EXISTING WMS

System-Agnostic

Dimensioner is integrated with Magaya Supply Chain and can also connect with your existing WMS or ERP software, making it easy to get started without needing to replace your entire infrastructure.

SPECIFICATIONS

Pallets and Parcels

Uses sophisticated software algorithms for fast and efficient measurement of pallets or parcels, regardless of shape, size or material.

Pallet Dimensioner
