

Flow WMS by Magaya

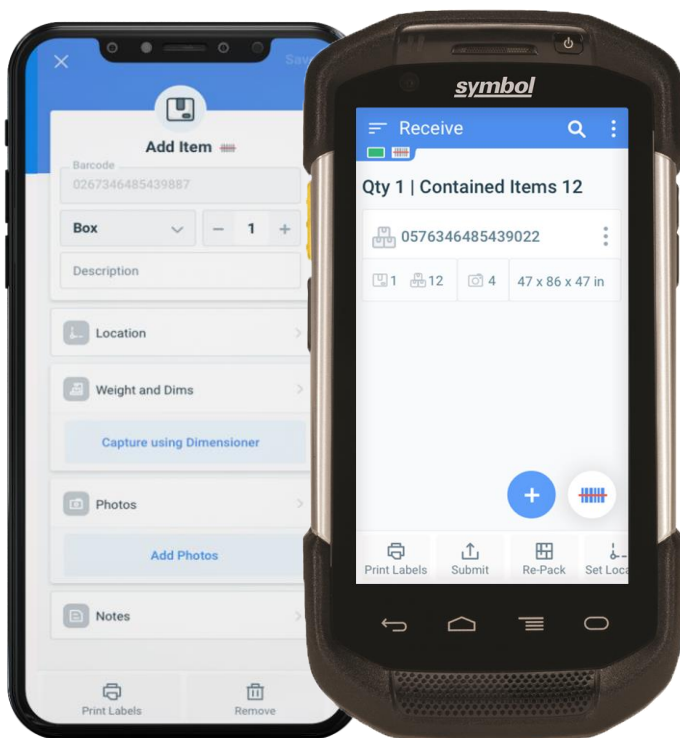

Your most efficient warehouse ever with integrated mobile WMS

Every minute, every step, and every action count in warehouse operations

With Flow WMS, the new generation of mobile warehouse management software from Magaya, the power to dramatically increase warehouse productivity is in the palm of your hand!

This new mobile app, designed for Android™ and iOS™, gives you the freedom of a modern mobile warehouse management app with the real-time visibility and functionality you need for efficient and fast receiving and warehouse operations.

With flexible, customizable workflows and complete control of your warehouse tasks, Flow WMS goes beyond basic warehouse inventory control giving you true productivity in the warehouse.

Available on Google Play for Android and the Apple App Store for iOS

BENEFITS

Integrated

Flow WMS is designed to work in perfect harmony with your Magaya system and Magaya Dimensioner, giving you the perfect toolset for your most efficient warehouse ever.

Real-Time

Scan barcodes and take photos with the Flow WMS app and attach them in real-time to the related transaction in your Magaya system.

Intuitive

Leave clunky old mobile WMS tools in the past, where they belong! Flow WMS has a modern, intuitive interface your users will love, encouraging fast adoption and frequent use.

Works Without Wi-Fi

Warehouses are notorious for having wi-fi dead zones. Flow WMS keeps you up and running with mobile data - even in the event the wi-fi connection drops.

Photo Capture

Document your inventory with photos from the device's built-in camera. Capture high quality photos and scan barcodes, then upload them in real-time to the related transactions in your Magaya system.

RECEIVING

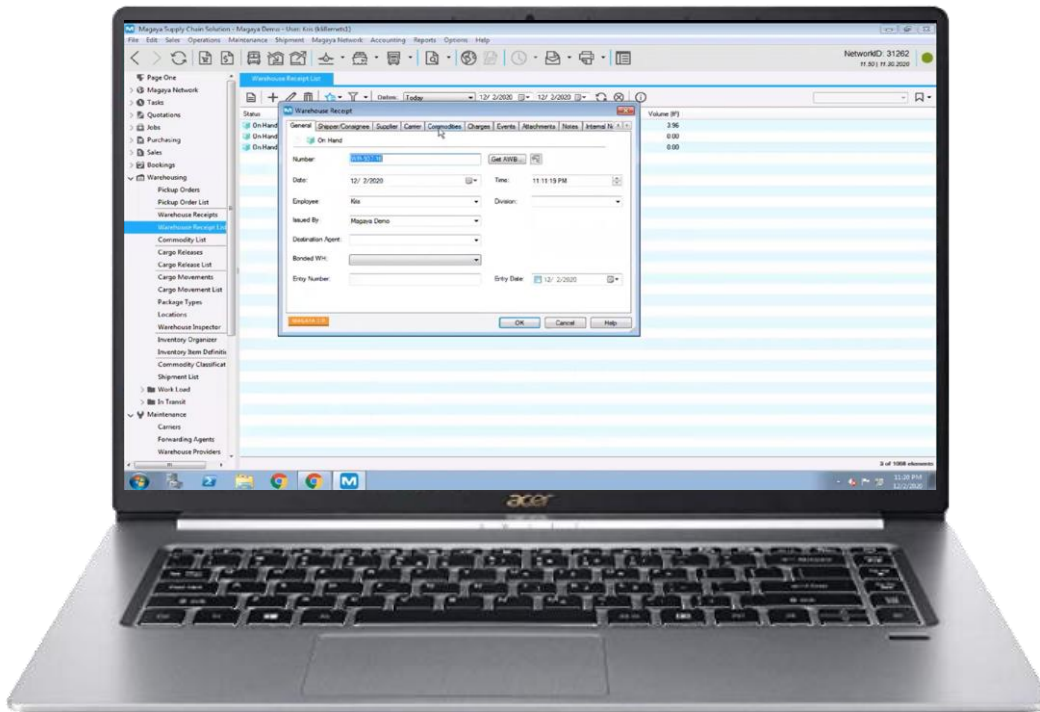

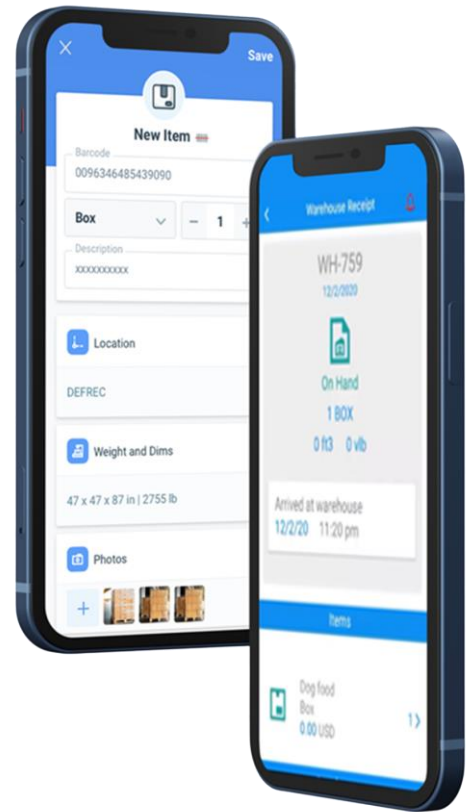

- Blind or by reference
- Quick receiving or full details
- Scan or manually enter items
- Capture photos
- Obtain weights and measures from Magaya Dimensioner
- Print labels
- Repack

LOOKUP

- Find and edit items by tracking number or location
- Take additional photos as needed
- Assign new locations
- Reprint labels
- Obtain weights and measures from Magaya Dimensioner
- View and edit item data

SPECIFICATIONS

- In-progress operations saved on the device
- Progress can be saved before submitting
- Works over wi-fi or mobile data
- Compatible with Android (6 and newer) and iOS (11 and newer)

Easily scan and photograph items, submit to Magaya Supply Chain and notify customers in real-time via the Magaya Digital Freight Portal and LiveTrack Mobile App by Magaya.
