Magaya Network

Standardize communication across the supply chain from origin to destination

The Magaya Network helps you make connections and grow your business with the power of a worldwide community of supply chain professionals.

As a supply chain professional, you understand the challenge of communicating with the various stakeholders that interact with your business. From agents to customs agencies, customers, couriers, and other partners, each one has its own unique way of exchanging information.

The Magaya Network easily solves that problem with a unified digital platform for standardized communication across all players in the supply chain. Using one platform to communicate gives you and your stakeholders full visibility and optimizes your workflows, all while using a secure online system.

"I am a big fan of the Magaya Network. A lot of the big one-off shipments I do go to countries where I don't have regular agents. In those instances, I use the Network to find agents I can do business with that already use Magaya."

Carter Cordon

BENEFITS

Gain Real-Time Visibility

As information is exchanged via the Magaya Network, your shipment file is shared with destination agents and updated in real-time. Updates made by a destination agent are visible immediately in the Magaya system at origin, providing you with the real-time, up-to-date information you need to bring your business to the next level.

Unlock Growth Opportunities

Users gain instant access to over 2300 companies across more than 100 countries, opening up a world of opportunities to grow your business and expand its reach.

Communicate Efficiently

The Magaya Network expands your business' reach exponentially by allowing Magaya users to not only communicate via chat but to send and receive transactions, documentation, and other data directly to other users without ever leaving the Magaya Supply Chain solution.

Protect Your Business

Sending information over email, EDI, or fax leaves your business vulnerable to data breaches, cyberattacks, and errors. With the Magaya Network, you retain complete control over what documentation and transactions you send in the secured system.

FEATURES

MAGAYA COMMUNITY

Once you create a company profile, you can connect with more than 2300+ potential business partners. As you send and receive invitations, you can approve or deny connections with companies based on your needs.

DIRECTORY

Perform an advanced search by company name, location, or keyword. Users can search for other companies that are using Magaya software and view any invitations you have sent or received.

SEARCH

With the ability to easily search for specific shipment requirements, you can reduce the time it takes to find the perfect partner. Keywords can include any special service you need such as a company that handles oversized cargo, hazardous materials, or transports vehicles.

COURIER SHIPPING

You can easily track courier shipments with an end-to-end shipping order management solution that allows you to exchange and view messages and tracking numbers from couriers such as UPS, USPS, DHL, and FedEx.

US CUSTOMS CONNECTIONS

Save time and stay compliant with US Customs via the ACE-certified Magaya Customs Compliance integration, enabling you to view all messages related to the Automated Manifest System (Ocean ANS/ISF and Air AMS).

CARRIER CONNECTIONS

With a turnkey integration to ocean carrier software systems, you can display all messages sent or received directly from ocean carriers using the Magaya Ocean Carrier Interface with INTTRA. Exchange messages between your system and air carriers when you send the air waybill electronically via the eAWB feature, allowing you to eliminate errors and save time on air shipments.
