RORO SHIPPING

Features for Roll-On Roll-Off Vehicle Shipping

From the POA to the Letter of Intent, do you find yourself bogged down with tons paperwork? Are you tired of manual data entry of car details that can be prone to errors, like keying in VIN numbers? Are you able to automatically add vehicle images to your system of record? Do customers continuously call or send an onslaught of emails wanting to know where their cargo is at all times especially as port congestion continues to delay shipments around the world? If you are faced with these day-to-day struggles, let Magaya help you work smarter, not harder!

Magaya has developed an integrated suite of solutions designed to help RORO vehicle shippers modernize, digitize, and automate operations. You'll save time and money by boosting productivity and eliminating the errors that go along with doing things the old-fashioned way. Plus, your customers will appreciate the added visibility and transparency they get with online self-service tracking and 24/7 access to vehicle images, important documents, location, and more.

With Magaya solutions for RORO shipping, you'll have everything you need to work smarter, ship faster, and build a loyal customer base, paving the road ahead for growth and success!

Vin Decoder

Streamline exporting vehicles by automatically gathering vehicle data such as the make, model, and year when you simply scan the VIN. The vehicle information appears instantly on your transactions and documents such as Warehouse Receipts, Pickup Orders, Quotations, and shipments. You can even send the information to US Customs through the Magaya system.

Flow WMS

No Wi-Fi where you're snapping pictures of the vehicles you're shipping? No problem! With Flow WMS, you'll save time and speed up the receiving process by scanning barcodes and capturing high-quality photos right from your Apple iOS or Google Android mobile device. Everything gets updated in real-time with mobile data, plus, you'll enjoy the freedom from the expensive, clunky, outdated WMS hardware of the past.

LiveTrack Mobile App

Give your customers 24/7 access from any device to Pickup Orders, Warehouse Receipts, Cargo Releases, Shipments, Sales Orders, Purchase Orders, Invoices, and more with the LiveTrack Mobile App by Magaya. They'll love the automatic notifications at every step of the shipment, and you'll appreciate the freedom from phone and e-mail inquiries, saving you time. Customers can even view and print attached documents such as the Air Waybill, Bills of Lading, vehicle photographs, and more. Keep customers apprised of rates for services and enable them to sort based on measurement of the cargo, mode of transportation, origin and destination. Customers can also view existing bookings and place booking requests, which are sent directly to your Magaya system.

STREAMLINE RORO SHIPMENTS FROM START-TO-FINISH WITH MAGAYA

RORO & CONTAINER SHIPPING QUOTE
Generate instant quotes with our simple and easy-to-use rate search platform.

BOOKING
Search and compare rates, select your vessel, and generate a quote error-free, within minutes.

PICK UP ORDER
Convert your quote into a Pickup Order to initiate your shipment. You can also use the Pickup Order function to create tasks to give to drivers who have the Magaya Final Mile app so they can complete pickups and deliveries.

VEHICLE PHOTOGRAPHS
Save time and speed up the receiving process with the Flow WMS app by capturing high-quality photos right from your mobile device and uploading them in real-time to the related item in your Magaya system.

WAREHOUSE RECEIVING
Receive your vehicle, inspect it and add notes to your shipment with the Flow WMS app that allows you to manage your warehouse from your mobile device.

CAR/VIN VERIFICATION
Verify the Vehicle Identification Number (VIN) with Magaya's VIN Decoder. It automatically gathers vehicle data and sends the information to US Customs through your Magaya system.

CARGO TRACKING
Enable customers to track their cargo from the moment a booking is created. If they are shipping their vehicle in a container, the Magaya Container Tracking Extension tells them exactly where their container is at all times.

CUSTOMER DOCUMENT FOLLOW-UPS
Follow up on any missing paperwork, signatures, or additional information for shipments directly through your Magaya System, allowing you to send your customers email notifications, optimizing our customer service.

DOCK RECEIPT
Create a dock receipt with your Magaya system and send it to your customer through our built-in email notifications.

MASTER TO CARRIER
Send the Master to the appropriate carrier directly from your Magaya system.

LOAD PLAN/MANIFEST
Create the load plan/manifest within your Magaya system.

CUSTOMER PROOFS
Send customer proofs via automatic email notifications that are set up in your Magaya system.

CUSTOMS FILING
File your customs paperwork with ACELYNK ABI, Magaya's fully integrated and compliant ABI solution.

CARGO TRACKING
Receive alerts on cargo status, automate the customer service process, provide logistics tracking and visibility, and streamline operational processes with the LiveTrack Mobile App by Magaya.

AR/AP FROM SHIPMENT
Access the shipment's AR & AP details with just one click.
