#### US OneVERIFY® \*

US OneVERIFY uses the same technology as our US OneSEARCH. Criminal matches are verified directly at the source before being reported, updating the record to match currently available public records, completing incomplete records, and allowing reporting of records that become legally reportable based only on the updated and complete record.

#### Statewide Criminal Search

A statewide search may yield information from multiple counties in a given state that report to a repository, useful for discovering crimes outside of the immediate area in which the subject lives or works.

We perform international criminal records checks all over the world. We determine if a record exists associated with an applicant in local criminal court or police jurisdictions. Our searches are performed (when permissible) at the district or city court level based on a particular country and the availability of the information. Content may vary from country to country.

\* State law in California, Connecticut, Indiana, Maine and Minnesota prohibits unverified database information from being used in employment and tenant screening decisions. Should your applicant be performing core job duties or residing in one of the above states, a verified database product will be required.
