<p><b>Criminal Database- US AliasVERIFY</b> (clears- instant, possible hits 1-3 business days)</p> <p>This is a multi-faceted search that combines a search through the industry's #1 criminal conviction database with known aliases sourced from a name and address history based on the subject's social security number. The names searched for include the primary name and other names found in the name and address history for your subject, such as maiden names, previously married names, middle names used as first names, nicknames and other aliases. With a US AliasVERIFY check, we will not only search more than 550 million criminal records from counties, departments of corrections (DOC), administrative Office of courts (AOC) and offender registries from all 50 states, plus Washington DC, Guam, and Puerto Rico for the provided and alias names found, but we will also verify criminal matches directly at the source before reporting them, updating the record to match currently available public records, completing incomplete records, and allowing reporting of records that become legally reportable based only on the updated and complete record. <a href="#">See a sample report</a></p>	<p><b>\$6</b></p>

<p><b>Let us design a custom package to meet your needs</b> There is no standard background check package because different industries, and even different companies within the same industry, will have different criteria regarding what constitutes an eligible candidate. Your company should have packages set up based on business necessity, packages that should be different for different types of jobs. Any executive position should be subject to more stringent testing than a basic minimum-wage employee. The depth of your screening should reflect the risks arising from criminal misconduct in each specific position. Contact Allison Sestak for additional information on custom packages.</p>	<p><b>Prices may vary</b></p>

<b>Applicant Entry Portal</b> The self-order portal allows our customers to delegate some of the background screening process to their candidate, inviting the subject to enter their own information to complete the search and, where legal, pay for the check themselves. The system is optimized for use on mobile phones, increasing the chances that candidates that receive and open the email-based invitations on their smart phones will immediately complete the remaining steps in the process and hence reduce overall turnaround time for the background check process. Self-order reduces your cost, the possibility of data entry errors, and the amount of time it takes to initiate background checks.	<b>No charge</b>
