

The Gardens at Elm Bank

The gardens are an integral part of Massachusetts Horticultural Society (MHS), a nonprofit with a mission dedicated to encouraging the science and practice of horticulture and to develop the public's enjoyment, appreciation, and understanding of plants and the environment. MHS leases the garden area from the State Department of Conservation and Recreation. (DCR)

 Restrooms are located on the west side of the Education Center.

 Service Dogs Only. Help us maintain the quality of the gardens by leaving pets at home.

Final Day for garden visitation is October 31

The Gardens at Elm Bank

Trial Garden

The first garden installed by MHS; it is one of three trial gardens in New England, and tests new and unreleased varieties of annuals and perennials, as well as heirloom vegetables. Plants under trial are grown beside similar, established varieties and are judged based on suitability for growing in zones 5 and 6.

Hartley Botanic Greenhouse

Installed in 2017, this beautiful greenhouse displays how home gardeners can accommodate and use a greenhouse on their property.

Shade Garden

This garden features a variety of hosta and other shade-loving plants, many donated by the New England Hosta Society.

Jim Crockett Memorial Garden

This relaxing area is a favorite for picnics and catching up with friends. Dedicated to honor Jim Crockett (of PBS's 'The Victory Garden'). Crockett was a member of Alpha Tau Gamma fraternity at Mass Stockbridge School who donated this perennial shade garden.

Weezie's Garden for Children

Designed by Julie Messervy, this layout highlights small 'rooms' in one large space, created to engage the senses and spark imagination. Rooms include a pollinator garden, backyard wildlife garden, and more. A highlight of this garden is the misting water feature surrounded by colorful stones. These stones are petrified wood, a form of fossil, which ties into the prehistoric plants and Ginkgo tree growing near-by.

Bressingham Garden

Added in 2007 and designed by plantsman Adrian Bloom of Bressingham, England, this garden was installed in two days by more than 200 volunteers. It is a four-season garden that uses 'mass planting' techniques to create visual impact. Island beds full of perennials and trees create functional and beautiful residential landscape example.

Seed to Table

Vegetable Garden

This garden was established with the purpose to help people learn about growing their own food. From raised beds to potted containers, this garden showcases different ways home gardeners can find success.

Manor House

Alice Cheney-Baltzell was the last individual who lived on this property. In 1907, she hired Carrere and Hastings to design the house (this firm also designed the NY Public Library) and the Olmsted Brothers to design the gardens. It was built at the same time as the Hunnewell Building (which functioned as the carriage house). Learn more about the history of Elm Bank on our website.

Olmsted Italianate Garden

This garden was designed by Percival Gallagher of the Olmsted Firm and functioned as a room of the Manor house with its tall, hedged walls. The Camperdown elms (trees nearest the house) are grafted trees and original to Gallagher's design. The fountain is a 14th century Spanish baptismal font, purchased by Alice Cheney-Baltzell on her honeymoon. During evening garden events this fountain illuminates with a rainbow of colors.

Asian Garden

This garden was part of Olmsted's original 1907 design, and is awaiting permitting to be restored. A handful of trees in this area are original to the design, along with the slate pavers you will find circling the pond.

Native Plant Garden

A designated Pollinator Pathway, this garden is always buzzing. Managed by the Noanett Garden Club.

Teaching Herb Garden

Planted like a clock, each wedge has a theme highlighting the herb's use or history. This garden is maintained by the New England Unit of the Herb Society of America.

Allan Peyton Memorial

Rhododendron Garden

Planted here are unusual small-leaved varieties of rhododendron and varieties that can grow in full sun. Find shade varieties near the garden entrance. Visit in spring for optimum blooms.

Daylily Garden

This garden features more than 100 varieties of heirloom daylilies. Visit in early summer for optimum blooms.

Goddess Garden

These statues are the Roman goddesses Flora, Ceres, and Pomona. They were originally installed on the facade of the 2nd Horticulture Hall in Boston. In 2020 these goddesses received a much needed cleaning and restoration. See their full story on our website.

Upcoming Events

Garden Tails, Drop-in Storytime
Mondays & Wednesdays, 11am.

Seeing the Invisible, Augmented Reality Exhibit
Opening simultaneously around the world, this exhibit features more than a dozen works by international artists. *Preview this exhibit until 10/31. Returning in 2022*

13th annual Festival of Trees

A holiday event for the whole family! Showcasing dozens of decorated trees, our model railroad display, S'mores and more. *Opening day, November 26*

Garden Etiquette

- Walk only on paths and lawns, not in garden beds.
- Leave the plants and animals as they are.
- Keep the garden smoke-free.
- Carry out what you bring in and do not leave belongings unattended.
- Sports activities, pets, bikes, trikes, scooters, and loud sounds belong elsewhere.
- Please keep your children in sight.
- Photography sessions are not permitted without an appointment.
