

Destiny One Badging

Increase learner engagement
by offering badges for accomplishments

Higher education institutions are increasingly turning to badges as a means of recognizing the achievements of their learners. Badges are a valuable means of increasing your institution's exposure and improving engagement with learners.

Destiny Solutions is proud to have partnered with the leading badge management system provider, Credly Acclaim, so that you can quickly and easily issue badges directly from Destiny One.

Pricing

Destiny One Badging is available today, and gives you access to Credly Acclaim's market-leading digital credential platform right from Destiny One.

"Digital badges are data rich in ways that paper-based certificates and resumes or PDF transcripts can't be."

—Elizabeth Rees-Johnstone, Executive Director of Continuing Education and Professional Learning at OISE, University of Toronto

Set Up and Training

The Destiny One Credly Connector offers a seamless real-time integration between Destiny One and Credly Acclaim. All account setup and training materials are provided directly from Credly Acclaim, however, Destiny Solutions has published a setup and user guide for the Destiny Connect Credly Connector, available on the GROW! customer portal.

How It Works

You already use Destiny One to create your course sections, certificates, conferences, and program offerings—now all you need to do is link a digital badge to each offering! Then, school staff can easily issue the badge to eligible learners enrolled in each offering, either in batch or for individual learners, from within Destiny One. Learners will receive an email allowing them to claim the badge, and post it on an online profile and other social media sites, including Facebook and LinkedIn.

As learners share their accomplishments they also help spread the word about your offerings. By clicking on a badge, any viewer can review the requirements that the learner had to complete in order to earn the badge. Additionally, we recognize that you may wish to issue badges that are not necessarily tied to offerings in Destiny One, so these can be issued in Credly Acclaim. These badges will still count towards additional badge fees, if applicable for your package.
