

Technology Innovation & TXT Development in Aerospace & Aviation

Marco Guida

Milan, April 19th 2018

” TXT e-solutions is an international, specialized provider of engineering software solutions supporting customers in high-tech markets in their mission- and business-critical core processes and throughout their product lifecycles.

Aerospace & Aviation

Product development, customer engineering, manufacturing and aircraft operations

Automotive & Transport

On-board software and systems

Banking & Finance

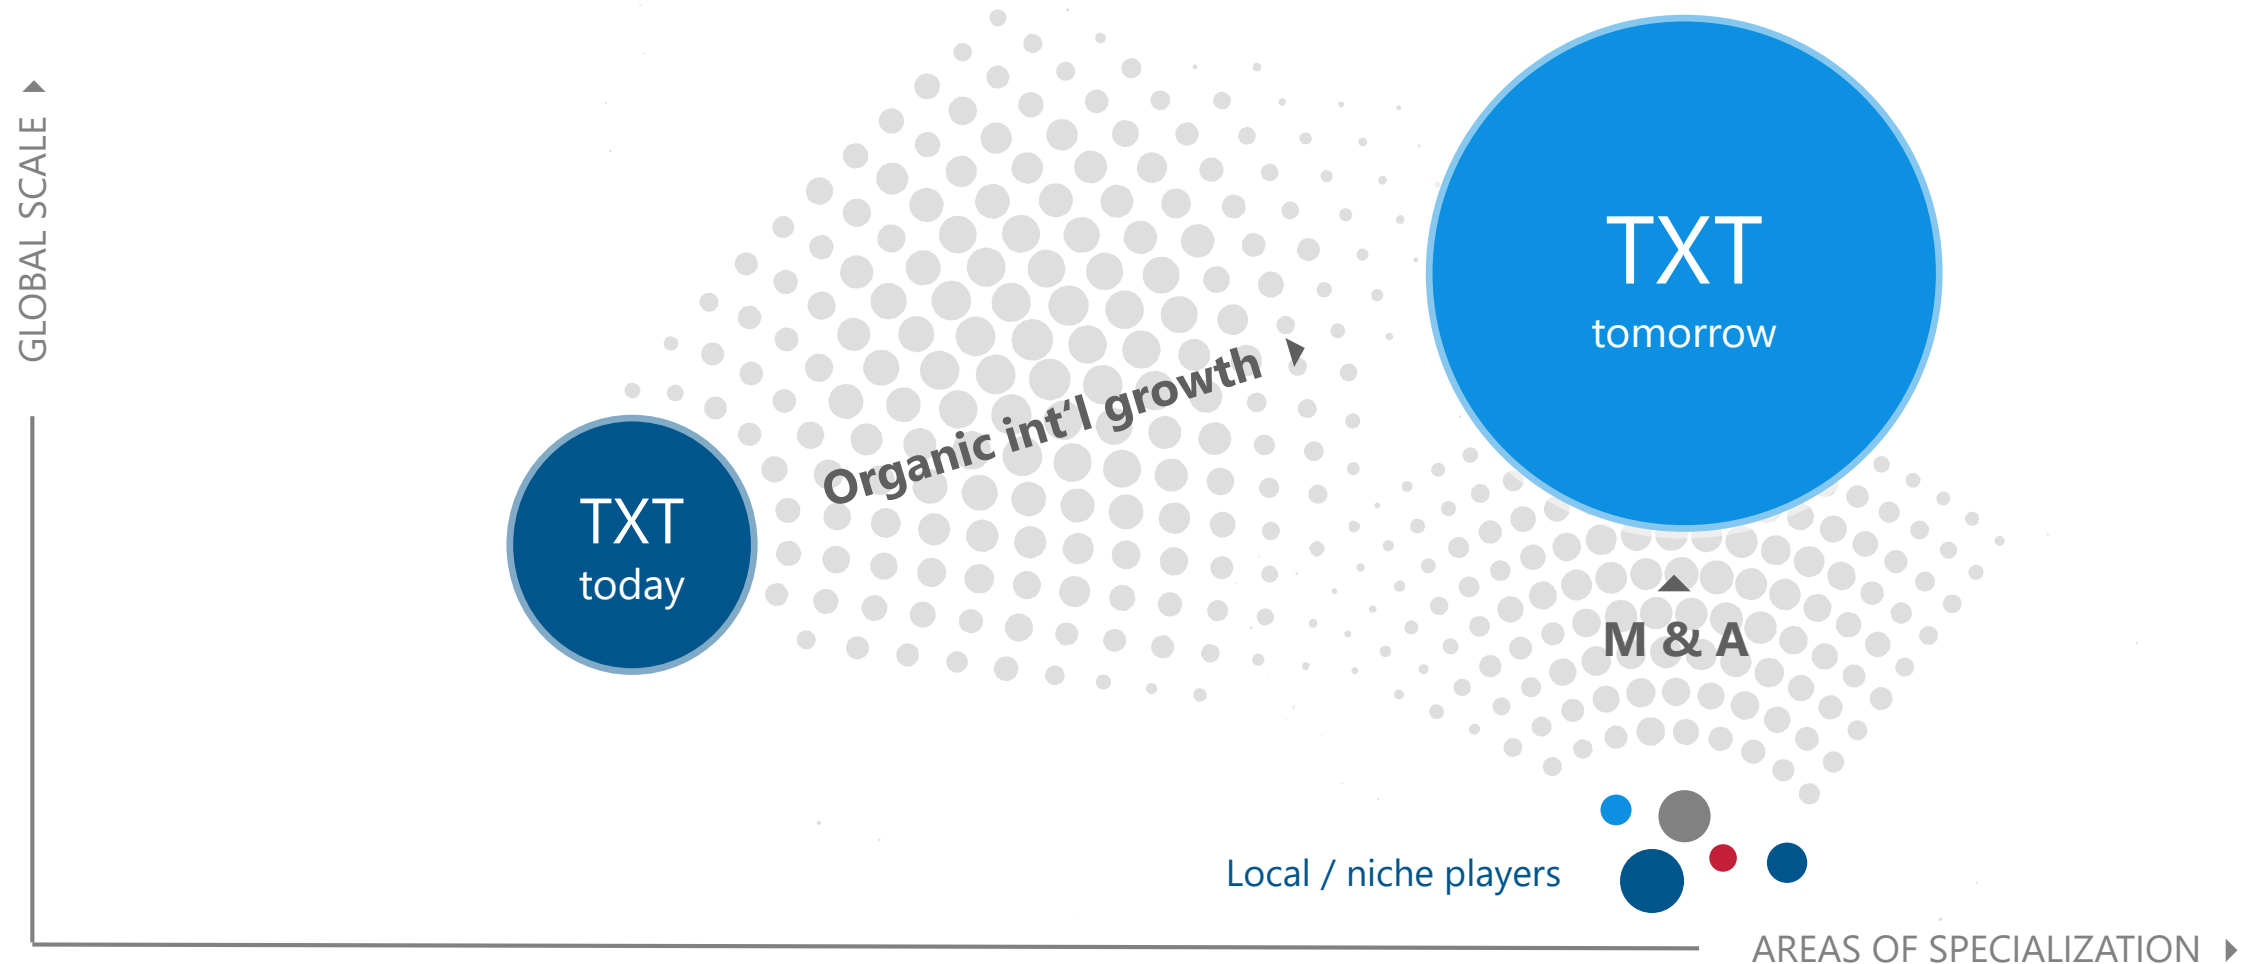

Independent testing, verification and validation of core applications and software quality services

Company Vision – Where We Are Headed

Specialization in **multiple high-value areas** across our target industries value chain, and ability to serve customers locally, yet on a global scale

Aircraft OEMs

1st Tier Suppliers & MRO Providers

Fleet Operators, Lessors & Consultants

Deep Engineering Knowledge Across The Aircraft Lifecycle & Value Chain

Preliminary Design
& Evaluation

On-board
Software

Product
Configuration

Digital
Manufacturing

Training
& Simulation

Flight Operations

Product Development

Customer Engineering & Manufacturing

Aircraft Operations

- **Breadth** and **Depth**: focus on high-value niches, but understand the whole picture
- **Industry** and **Technology** expertise: **Engineering Services**, backed by **Software Assets**
- **Flexible** engagements models, with **turn-key engagements** weighting $\frac{3}{4}$ of total

Virtual & Augmented Reality in Aerospace & Aviation

From advanced training applications to innovation in aircraft's cabin configuration

Pacelab WEAVR

New Platform for rapid development & deployment
of **Virtual Training** and **Operations Support**
applications

Pacelab Cabin

Evolution of existing **product capabilities**
with real-time Augmented Reality visualization

Virtual Training and Operation Support

DIGITAL TRANSFORMATION

From training manuals to interactive learning environments

"... a trusted and highly knowledgeable partner in the software development for training systems."

ALBERTO CERIOTTI

Former Head of Training and Helicopter Support Systems, AgustaWestland

A man with short dark hair and a beard, wearing a blue long-sleeved uniform shirt over a white t-shirt, is looking down at a tablet computer he is holding. He is standing in front of a large, circular jet engine with many dark blades. The background shows an industrial setting with various metal structures and equipment.

EASA - NPA 2014-22

"... it appears that any of the following training tools, or any combination of them, may be used: [,..] virtual reality; augmented reality; [...]."

PACELAB WEAVER, THE DIGITAL TRANSFORMERS

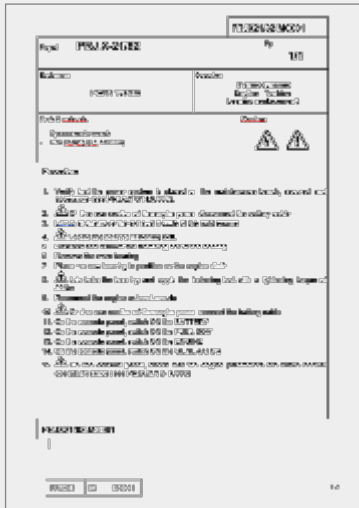

Designed according to EASA standards for
Maintenance Training & Maintenance Operations
(Part 147 & Part 145)

Virtual Training Solutions | One Set Of Technical Data, Many Applications

Riding the **DIGITAL TRANSFORMATION** of Aerospace: get the most out of your most valuable assets and turn your **technical** and **procedural** knowledge into state-of-the-art **virtual training** and **operations support solutions**

DIGITAL TRANSFORMATION

3D models
Technical publications
Troubleshooting procedures
Systems descriptions

TRAINING

VR & AR solutions
Training real-world scenarios
in zero-risk environments

OPERATIONS

AR & VR solutions
On-the-spot, on-the job
support for technicians

Write once, **LEARN** everywhere

Running on 

Write once, **ACT** everywhere

Virtual Learning (PCs, Tablets, Smartphones)

Immersive "Learn by doing" (VR wearable devices)

Training on the job and Operations support
(AR-enabled Tablets & Smartphones; wearable devices)

From Virtual Learning, to Training on the Job, to Operations Support

PC/Tablet Computer-based Training:
non-immersive Virtual Training

Immersive Virtual Reality

Training on the Job & Operations Support
with Augmented (Mixed) Reality

Leveraging Hololens & Mixed Reality in Aircraft Cabin Configuration

The Airbus and Boeing Use Cases

Customer Base & References of TXT's

AIRCRAFT OEMs

AIRLINES

CONSULTANTS

Introduction to Cab Pacelab Cabin

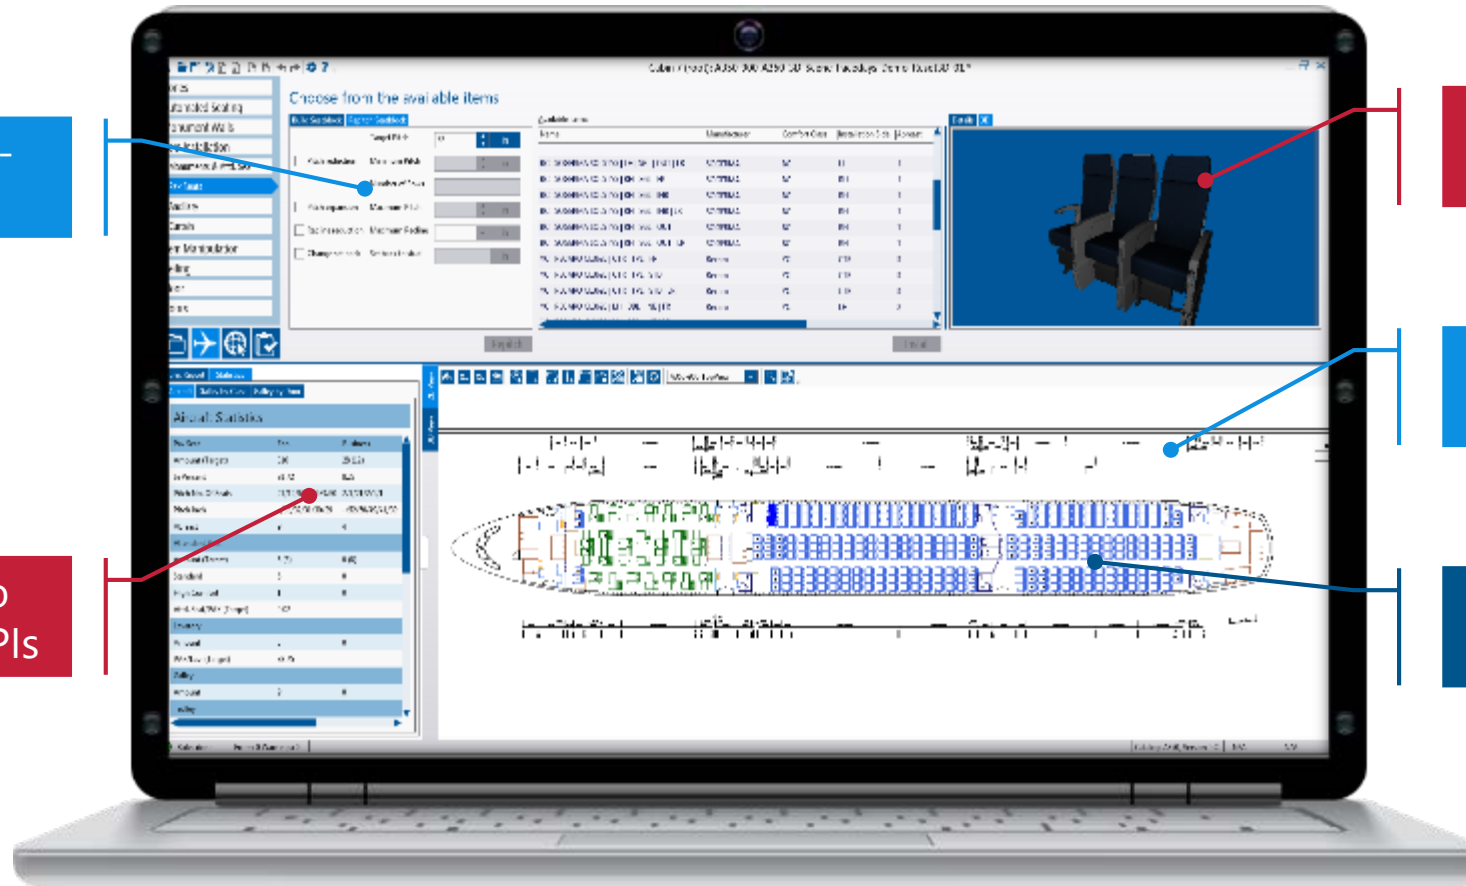

Support catalog-based selection

Visual support for selecting options

LOPA optimization & drawing generation

Instant access to key statistics & KPIs

Rules engine based check & validation

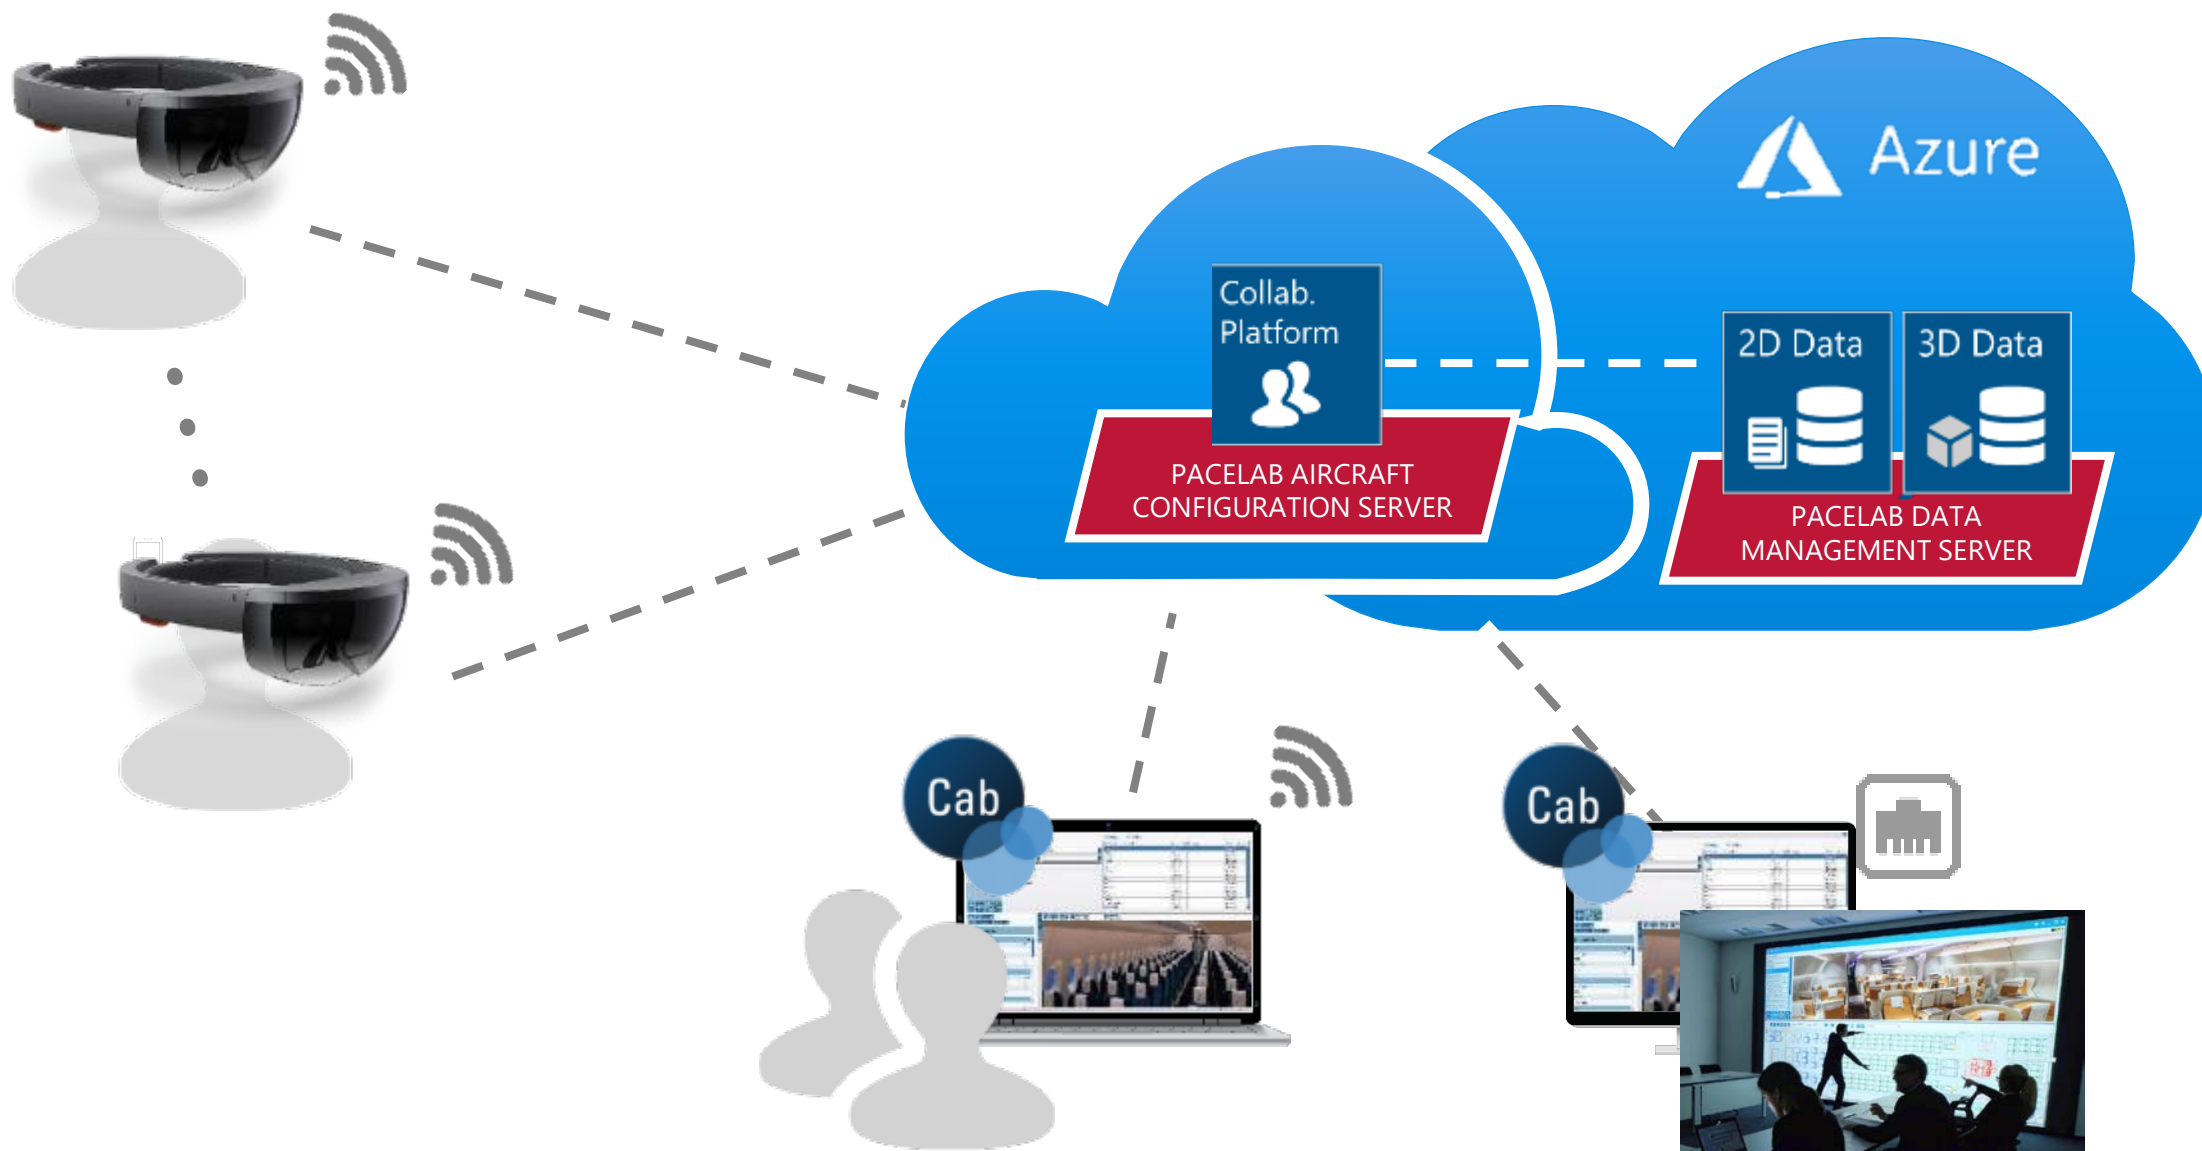

Installed in the
A350 XWB Customer Definition Centre
in Hamburg for a life-size display of the cabin

Desktop Size Collaboration

Pacelab Cabin | Innovation in Aircraft Configuration using Mixed Reality

VIRTUAL INTERACTIVE ELEMENT
(LUGGAGE COMPARTMENTS)

PHYSICAL MOCK-UP

VIRTUAL INTERACTIVE ELEMENT
(PASSENGER SEATS)

REALTIME UPDATE FROM
PACELAB CABIN

Mixed Reality Collaboration
