ANALYSES:

Left and Right Ventricle

Coronary CTA Analysis

- Segmentation of the four main coronary arteries and their sub-branches
- Planar reformations of each vessel
- Measurement of stenosis
- Reformatted double oblique stacks

Calcium Scoring

Skeletal 3D Segmentation

Pre TAVR/TAVI Measurements

- Aortic Root
- Trans-Femoral
- Apical
- Subclavian

Custom measurement protocols available

ABOUT PRECISION IMAGE ANALYSIS (PIA):

Precision Image Analysis is a world class provider of cloud-based, advanced medical 3D image post-processing and data analysis. PIA serves the global healthcare and research communities through remote image post-processing analysis and reporting services.

The company's solutions offer an excellent opportunity to avoid software and hardware capital expenditures while incorporating advanced image quantification at reduced cost and increased quality with exceptional standardization, reproducibility and turnaround times.
