ANALYSES:

Cardiac MR Functional Analysis
- Volumetric Analysis
- Flow / Regurgitation

-

Tissue Characterization
- T1
- T2
- T2*
- LGE
- Perfusion and
- Delayed Enhancement

Feature Tracking

MRA

Full Body

3D and 4D Organ Segmentation
- Volumetric Analysis
- Adipose Tissue Quantification

Disease Related
- Congenital Heart Diseases
- Cardiotoxicity of Chemotherapy

Custom measurement protocols available

ABOUT PRECISION IMAGE ANALYSIS (PIA):

Precision Image Analysis is a world class provider of cloud-based, advanced medical 3D image post-processing and data analysis. PIA serves the global healthcare and research communities through remote image post-processing analysis and reporting services.

The company's solutions offer an excellent opportunity to avoid software and hardware capital expenditures while incorporating advanced image quantification at reduced cost and increased quality with exceptional standardization, reproducibility and turnaround times.
