ANALYSES:

Measurements

LV Cavity

LVOT

Aortic Annulus

Aortic Sinus

Sinotubular junction

Curvature of aortic root

Superior and inferior heights of coronary ostia

Access Analysis

Femoral Access

Subclavian Access

LV Apical Access

Ideal Projections

Projection Angles, with optional corrections for patient postion on the exam table

Custom measurement protocols available

ABOUT PRECISION IMAGE ANALYSIS (PIA):

Precision Image Analysis is a world class provider of cloud-based, advanced medical 3D image post-processing and data analysis. PIA serves the global healthcare and research communities through remote image post-processing analysis and reporting services.

The company's solutions offer an excellent opportunity to avoid software and hardware capital expenditures while incorporating advanced image quantification at reduced cost and increased quality with exceptional standardization, reproducibility and turnaround times.
