Large Conference Room

Nexvoo DoubleView N120U

4K UHD dual-cam video collaboration bar

Typical Challenges

- Larger space and more participants to be covered during a video conference
- High requirement of resolution to present every detail
- Manually adjusting the camera angle and zooming in and out is exhausting
- Voice of those sitting at distance cannot be picked up clearly

How Nexvoo Can Help

- The dual-cam system enables a 120° FOV and 6x hybrid zoom, guarantees every participant is included
- N120U supports 4K UHD resolution and meet your requirements for detail presentation
- The AI-powered tracking and framing free your hands, make you more devoted to the meeting
- Up to 26ft/8m of voice pick-up range ensures all the attendees can be heard clearly

Medium Conference Room

Nexvoo OneView N110

4K UHD all-in-one video bar

Typical Challenges

- The video conferencing collaboration requires high investment in deployment, maintenance and budget
- On the other hand, the simple devices can't meet the needs of video/audio quality
- A wide enough FOV to cover 8 to 10 people

How Nexvoo Can Help

- The all-in-one video bar N110 helps you saving money on buying a collaboration of camera/microphone/speaker, and the USB connection provides convenience when using
- The N110 supports 4K UHD resolution and 16ft/5m voice pick-up range
- The camera of N110 can cover a 120° ultra-wide FOV, ideal for medium and large conference rooms

Huddle & Small Room

Nexvoo NexPod N109

All-in-One USB 1080P
Portable Camera

Nexvoo NexPod Pro N149

4K UHD Bluetooth
Speaker Tracking Camera

Typical Challenges

- Need a camera designed for conference room but with limited budget
- Need a simple device that can bring flexibility and convenience when conducting a video conference

How Nexvoo Can Help

- Both the N149 and N109 are all-in-one camera with AI tracking function, providing high video and audio quality of video conferencing
- The compact design makes them easy to carry between different rooms
- The N149 can also be used as a Bluetooth speaker since it's equipped with a rechargeable battery
- Affordable price, premium product experience

Flexible Workers

Nexvoo NexPad T530

4K Google Certified Video Conferencing Tablet

Nexvoo Webcam N108

1080P USB webcam

Typical Challenges

- Need a video conferencing device in a more professional level than laptop's built-in camera
- For personal use, the possibility to use multiple video conferencing applications is important
- When working at home, family members, including kids and pets may produce unexpected noises

How Nexvoo Can Help

- The T530 and N108 supports 4K and 1080P resolution, and the T530 integrates premium-level camera, mic and speaker. Both products provide good quality of video and audio
- The T530 has built-in Google Play Store, users are possible to install the video conferencing applications they use frequently on the device
- Supported by smart AI functions, both products can block out household noises

About Nexvoo

Founded in Indianapolis, United States, with European headquarter in the Netherlands, Nexvoo is a high-tech enterprise specializing in smart UC terminals, catering to both B2C and B2B markets.

We utilizes US-based Qualcomm chipsets with Google certification in our products, offering additional levels of scrutiny and certifications of safety and quality.

Nexvoo's commitment to quality is absolute. We are regularly audited by a range of internationally recognized quality certification bodies. Nexvoo strives to meet the highest expectation of cost-effective products and services of advanced technology from its customers and partners.
