

You CAN have superior THC remediation!

If you need expert remediation of THC or other unwanted materials, it IS available for all your conventional and USDA-certified organic materials!

PHCO₂ offers whole plant hemp crude, distillate, and extract remediation using a proprietary supercritical CO₂ process that yields consistent, superior results—all processed under food-grade compliant and kosher conditions.

PHCO₂ expertly removes:

- THC
- Pesticides
- Heavy metals
- Other unwanted items

While returning your material with:

- High CBD
- High minors
- High mass content

Send a 30-gram sample of crude or distillate, and we will test your material free of charge, providing you complete test results.
