

PEOPLE COUNTING

www.IronYun.com

The Vaidio AI Vision Platform delivers video analytics solutions for Security, Safety, Access Control and Social Health Screening. Vaidio's advanced AI makes video monitoring, security alerts, health screening and forensic investigation more accurate, more automated, and more affordable - and helps make your business safer and more secure.

Vaidio's People Counting quickly and accurately tracks and determines the number of people in the camera's field of view. Able to process in real-time, People Counting is valuable in service management analysis and forecasting for both security and business intelligence purposes. It can be used in many types of public access areas, such as transportation hubs, airports, theme parks, national landmarks, entertainment venues, retail shops, tourist attractions, banking, and corporate facilities.

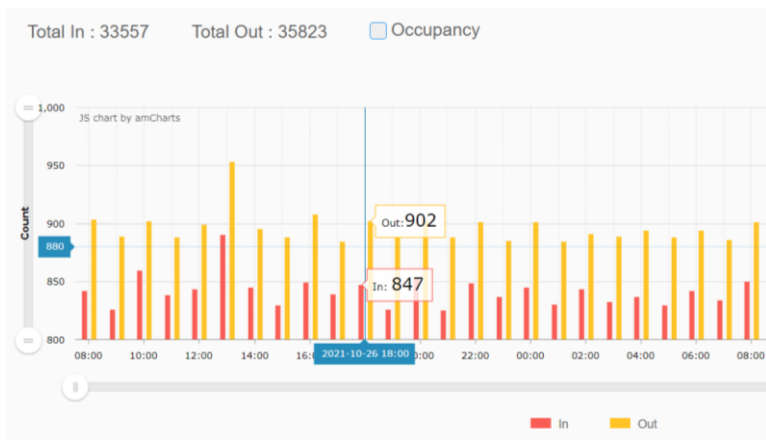

FEATURES

- ❑ Track people movement
- ❑ Detect and trigger real-time alert for people moving in the wrong direction and/or person falling.
- ❑ Detect and trigger real-time alert for people loitering in certain areas of interest
- ❑ View real-time alert on the map: show the detected event on the map based on camera’s location
- ❑ View live streaming as Video Wall on Vaidio user interface
- ❑ Count people in real time in inbound and outbound directions
- ❑ Customize event and alert management and provide statistics for easy review and export

BENEFITS

- ❑ Use with nearly any existing ONVIF IP-based camera, no need for expensive, preconfigured cameras
- ❑ Connect and integrate with any third-party video management system
- ❑ Set up with no programming or field knowledge required
- ❑ Define an unlimited number of lines to set up people counting
- ❑ Receive alerts via email, mobile app, or HTML
- ❑ View counting statistics by time, camera, line setting, and inbound and outbound direction
- ❑ Integrate with analog and 3D cameras to enhance performance, increasing the depth perception for improved accuracy
