

## Microsoft Defender for Endpoint

It is an enterprise endpoint security platform created to help enterprise networks prevent, detect, investigate, and rapidly respond to advanced threats.

Defender for Endpoint can be integrated with various Microsoft solutions like Azure Sentinel, Azure Defender, Teams, Endpoint Manager and more.

It is 1 of the 4 services that are part of Microsoft 365 Defender.

It includes Microsoft Secure Score for Devices to help you dynamically assess the security state of your enterprise network.

As a **Microsoft Gold Partner**, at **Tiberium**, we offer managed SOC services using cloud-native SIEM powered by automation & Azure Sentinel.
