

# INTRUSION *Shield*<sup>TM</sup> Datasheet V2

## Your business has been breached and is vulnerable to all types of security threats.

You need aggressive protection against malware, ransomware, data theft and other nefarious cybercrime. **INTRUSION *Shield*** is a comprehensive, network-centric, Security-as-a-Service solution for all businesses and governments.

**INTRUSION *Shield*** works different than cybersecurity products that try to keep bad actors out of your network. We know that all networks are already compromised from malware, spear phishing, breaches of firewalls, malware embedded on foreign manufactured device components, memory sticks, IoT devices, and dozens of other methods. That's why we work from the inside out, detecting criminal agents living on your network and neutralizing them in real time.

## INTRUSION *Shield* Uses:

- ✓ AI to detect and neutralize malicious network traffic.
- ✓ Real-time analysis of all incoming and outgoing packets.
- ✓ The reputation of all global devices, updated daily
  - Not just what one ***Shield*** has seen
  - 6.9 billion active reputations on IPv4 and IPv6
  - The combined AI from all sources to determine reputation

## TO PROTECT YOUR COMPANY BY:

- ✓ quarantining rogue agents and bad actors
- ✓ stopping ransomware and other nefarious activities
- ✓ stopping viruses and malware
- ✓ halting impersonation fraud
- ✓ shutting down business email compromises (BEC)
- ✓ preventing theft of intellectual property
- ✓ blocking fuzzing, contract hacking, and machine learning poisoning
- ✓ ending data compromises and data theft

“

*I think it's great how much **Shield** is blocking, but what may be even better is that business operations are running just fine in spite of all that is blocked. If my guys are happy and able to do their work while the network is protected, then my job just got a lot easier.”*

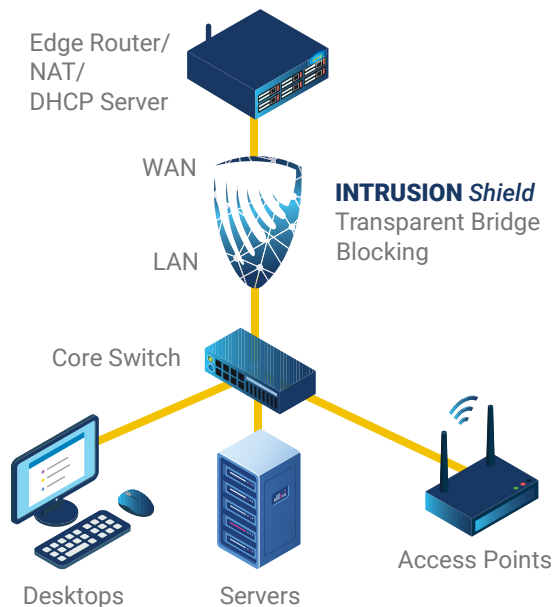

– Beta tester & customer, Anson, an IT Manager for a civil engineering company

## INTRUSION *Shield* is the premier cybersecurity solution because:

- ✔ **A quarter century of research** and analysis has gone into creating our one-of-a-kind, threat-enriched Big Data Cloud of global Internet traffic.
- ✔ **We mitigate financial and reputational risk** from cybercrime by bringing a level of protection that is immediate and unmatched.
- ✔ **You benefit from a huge virtual team** of IT resources without the expense of a single IT engineer.
- ✔ **No change management is required** as our solution utilizes plug-n-play implementation.
- ✔ **Threats are neutralized** upon detection in real-time, without needing an analyst to respond to thousands of security alerts
- ✔ **We prove efficiency and effectiveness** with frequent reporting that improves C-suite and boardroom transparency.

## We easily fit into your existing InfoSec solution

The best defense is a good offense. **INTRUSION *Shield***, the newest layer of cybersecurity architecture, is your best offense. We don't send alerts, we identify bad actors in real-time - and we eliminate them.

“

*Installation was an absolute breeze. Shield is like a traditional firewall on steroids where you're really paying attention to the ports and blocking them, but all the work is done for you.”*

– Beta tester & customer, Greg, an IT Manager at a retail organization
