

# INTRUSION

Protect everything. Trust nothing.

## INTRUSION *Shield*™

For directors and senior management in organizations looking for aggressive protection against unaddressed information security threats, **INTRUSION *Shield*** is a comprehensive, network-centric security-as-a-service.

**INTRUSION *Shield*** works differently than all other cybersecurity products that try to keep out bad actors. We know that all networks are already compromised from malware, spear phishing, breaches of firewalls, malware embedded in foreign manufactured device components, memory sticks, IoT devices, and dozens of other methods.

### INTRUSION *Shield* uses:

- ✓ AI to analyze and block malicious network traffic.
- ✓ Real-time analysis of all incoming and outgoing packets of network traffic.
- ✓ The world's largest Block List (2.8+ billion) and Approve List (3.5+ billion) of signatures and rules based on DNS, TCP, UDP, and the relationships between DNS and direct IPV4 and IPV6 addresses.

### To protect your company by:

- ✓ quarantining rogue agents and bad actors
- ✓ stopping ransomware and other nefarious activities
- ✓ stopping viruses and malware
- ✓ halting impersonation fraud
- ✓ shutting down business email compromises (BEC)
- ✓ preventing theft of intellectual property
- ✓ blocking fuzzing, contract hacking, and machine learning poisoning
- ✓ ending data compromises and data theft

ENABLED BY  
ARTIFICIAL  
INTELLIGENCE

**Cybercrime is set to cost  
businesses \$5.2 trillion  
within 5 years.**

– Accenture, Cost of Cybercrime Study, 2019

**Cybercrime created  
94 million victims in 2019.**

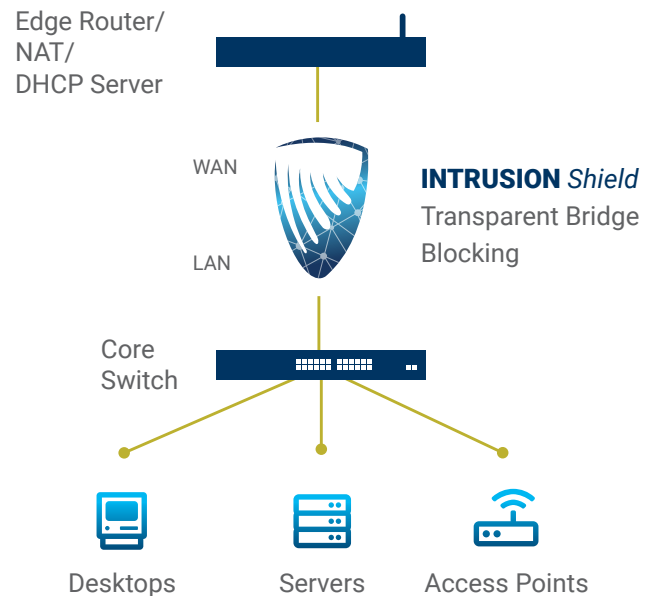

– Norton

## INTRUSION *Shield* is the premier cybersecurity solution because:

- ✔ **A quarter century of research** and analysis has gone into creating our one-of-a-kind inventory of global Internet traffic.
- ✔ **We mitigate financial and reputational risk** from cybercrime by bringing a level of protection that is immediate and unmatched.
- ✔ **You benefit from a huge virtual team** of IT resources without the expense of a single IT engineer.
- ✔ **No change management is required** as our solution is device-agnostic and boasts plug-and-play implementation.
- ✔ **Threats are neutralized** upon detection without the traditional requirement of equipment cleansing.
- ✔ **We prove efficiency and effectiveness** with frequent reporting that improves C-suite and boardroom transparency.

We easily fit into your existing InfoSec solution

**INTRUSION *Shield*** is a hands-off, multi-faceted approach that pairs well with all aspects of your existing InfoSec solution and offers turn-key implementation.
