

Custom Modular Lab

Dimensions:

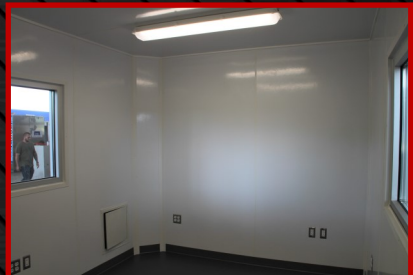

50'-0" (L) x 10'-0" (W) x 9'-6" (H)

Problem Solved:

The customer needed a custom enclosure for multi-area lab.

Description:

DropBox looked outside the traditional container modification to complete the first modular lab in a custom enclosure. The need for a custom enclosure arose from the customer's need to combine several spaces into one enclosure to limit the site preparation. This enclosure included an office, wet lab, utility closet, and two restrooms; these needs required the extended length. The lab space also included work surfaces on both sides and an emergency eye wash and shower; these needs required the extended width. Each space had a dedicated HVAC system to limit the mixing of air.

At DropBox, Inc., we are Reinventing the Box™ with high quality, customizable, sustainable shipping container modifications and engineered enclosures that make us the design/build partner for customers around the world. With a proven track record for quality and customer service, DropBox, Inc. has planted its roots firmly throughout numerous industries and built longstanding relationships with customers through custom products that meet their company specific needs.
