COUNTERFEIT PARTS PREVENTION POLICY

It is the policy of the EFPG to provide its' customers with newly manufactured product or components sourced from distributors or manufacturers having intellectual property ownership or proprietary rights or have distribution rights to those components. Elements within the quality management system have been created to detect, report and eliminate any material or components suspected of having qualities less than those of specification. The EFPG will not knowingly supply its' customers with counterfeit product and will take every precaution to preclude suspected product from entering the supply chain.
