Solutions for Child Safety

Find underage users on your platform & protect them with content moderation

Content moderation is especially important for children participating in online communities. Platforms are legally responsible for protecting them under the Children's Online Privacy Protection Act (COPPA) and other laws.   When platforms protect children, creating positive experiences, they earn the trust of kids, parents and society.

Kids often find ways to join online communities meant for adults. Our contextual AI helps you detect children under 13 who may be hidden on your platform. Then, you can remove them, or use our content moderation tools to protect them from exposure to harmful experiences.

Different communities, different goals

Platforms for Adults

Children on your platform create risk including COPPA compliance.

Find and remove underage users to protect them & your business.

Platforms for Kids

There is an expectation of more rigorous content moderation.

Improve your content moderation for a safer community for kids.

Platforms for Adults & Kids

You need stronger content moderation for children than adults.

Detect underage users and tailor content moderation for their needs.

Behavior models
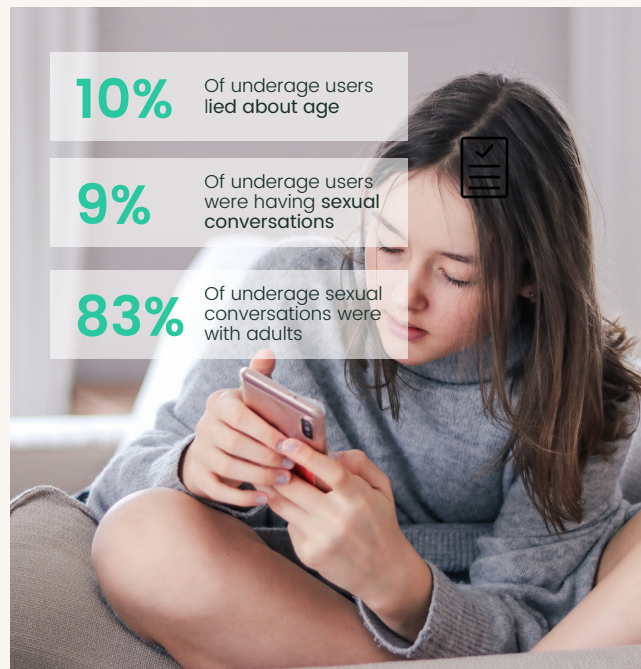

Detect children & the user activities that harm them

Underage Users	Find under-13 users, even those who lie about their age
Illegal Behaviors	Stop, report & prevent crimes against minors Sexual, CSAM Grooming, Solicitation of Sex, Drugs, PII Sharing (Doxxing)
Parental Concerns	Protect kids' experiences & increase parents' comfort level Hate Speech, Harassment, Sex Harassment, Bullying, Self-Harm, Radicalization, Violence, Severe Toxic, Insults, Porn Links, Misogyny, Profanity

spectrum labs
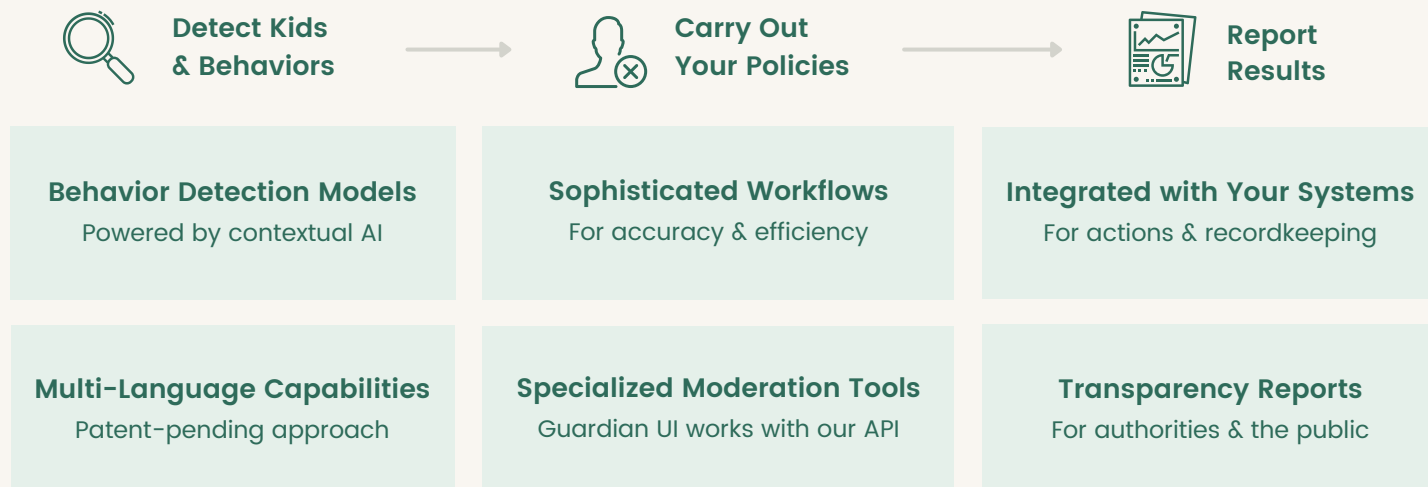

Case Study:

Identifying Minors & High-Risk Behavior

Using Spectrum's contextual AI, a social platform uncovered a large amount of high-risk underage sexual conversations.

How we identified users at risk:

Underage User Classifier Model

Sexual Content Classifier Model

+

Metadata

10% Of underage users lied about age

9% Of underage users were having sexual conversations

83% Of underage sexual conversations were with adults

Technology to enforce your policies

Design the right solution for the kids in your community.
