

Bristol Water Self-Lay Materials List

Version 6

Bristol Water will only allow self-laid mains and services to be connected to our network if they have been installed using materials which conform to the standard we require. A wide range of materials will be accepted, the following is a list of just some of them. SLP's wishing to use items not on this list must submit the full details of the fitting (manufacturer, model, and full technical specification) to allow us to verify the item is acceptable. The process can take up to 3 months. Any request should be sent to DevelopmentServices@Bristolwater.co.uk

This list only covers self-laid pipework and fittings that are to be transferred into Bristol Water ownership. Pipework and fittings that will belong to the property owner need only to be approved by WRAS.
