

ASSET COMPLIANCE & VERIFICATION SOFTWARE

JACKAL CREEK GOLF ESTATE CASE STUDY

PROJECT

Verification & Compliance – Golf Carts & Course Maintenance

SECTOR

Recreational

DATE

Engagement - Nov 2019

HOW DID ASSETPOOL HELP?

Jackal Creek recently purchased around 70 new Golf Carts with built-in course GPS management. Their previous fleet had to be replaced due to the condition of the carts. AssetPool checks the carts out in the morning and check the carts on return. If the player has caused damage to the cart the club is now able to recover these costs.

Furthermore there was a need for better record keeping of course maintenance and compliance. The clubs management can now without a doubt ensure that their course is being attended to by the green keeper and his staff as required.

KEY BENIFITS

- **Golf Cart physical condition verification & monitoring**
- **Golf course maintenance management**
- **Staff efficiency & performance management**
- **Paperless record keeping – Immediate data access**
