

Asset Compliance & Verification Software

Real-time risk analysis of all your vehicles, across all your devices.

School Buses • Public Transport • Garbage Trucks • Cleaning Vehicles • Snow Removal

WHY ASSETPOOL?

With current processes requiring intensive manual intervention in the way of:

- Manual inspection schedules
- Paper checklists
- Manual filing

AssetPool takes your safety seriously, we manage your organizations processes and filing, storing this live valuable data in the cloud!

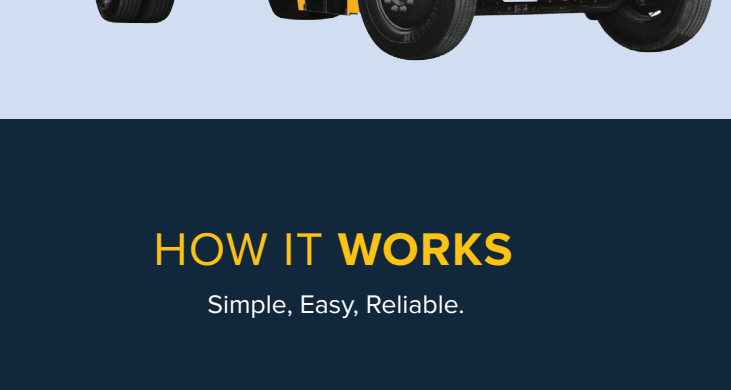

Automating the process, generating reports in seconds and access to our live interactive risk dashboard, enables Public Transport organizations to effectively manage their daily Asset checks as well as any associated risk. By use of the following:

- A system generated unique QR Code per vehicle
- Automated recurring job schedules, for each driver / operator.

We manage the when, where and what was checked, Pre and Post-Trip.

Rest assured that every organization making correct use of the AssetPool application will comply with regulations, while accurately recording each and every check.

AssetPool ensures accountability through technology.

HOW IT WORKS

Simple, Easy, Reliable.

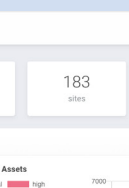

Scan

Scan the barcode and select the appropriate checklist.

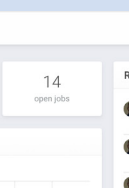

Inspect

A technician completes the checklist based on type of asset.

Measure

Asset risk is then calculated based on the outcome of the inspection.

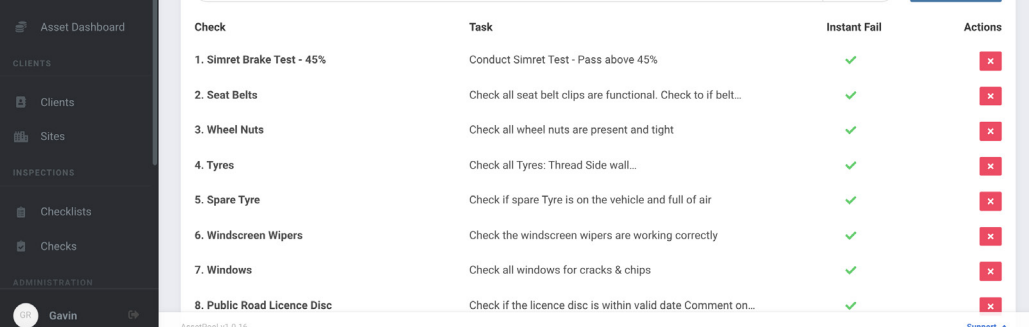

Report

Reports are immediately available to customers, including risk analysis.

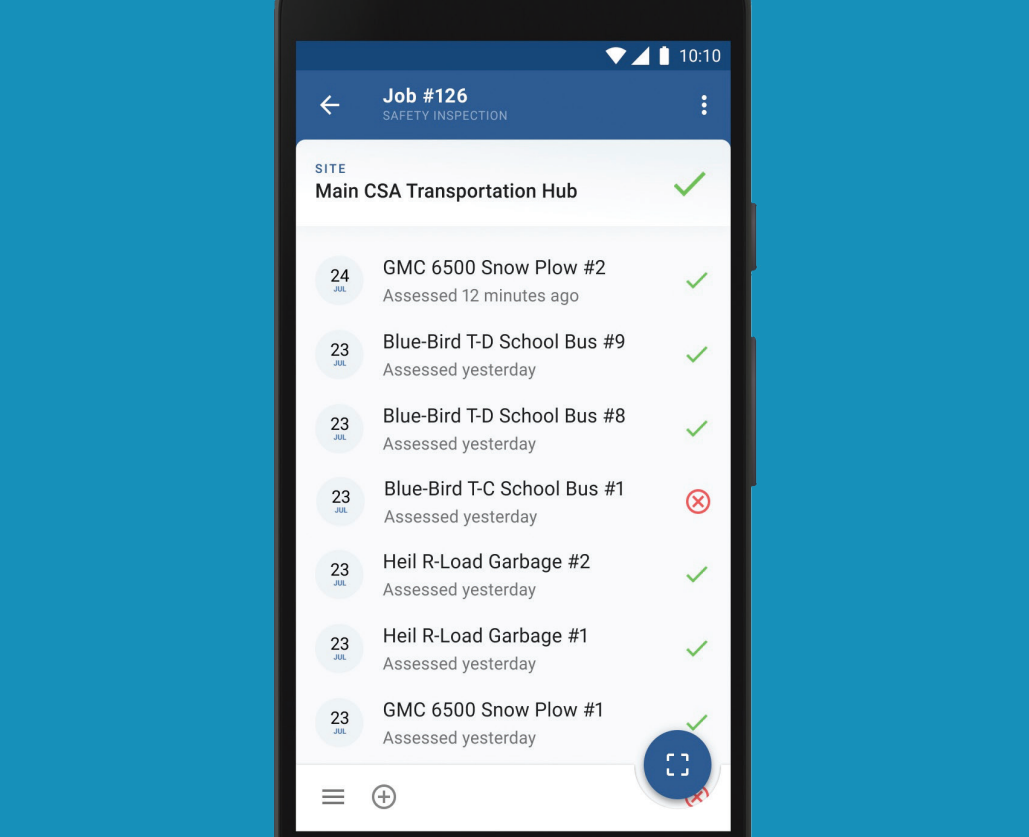

ADMIN DASHBOARD VIEW

Your business at a glance, Control & Reporting from anywhere in the world

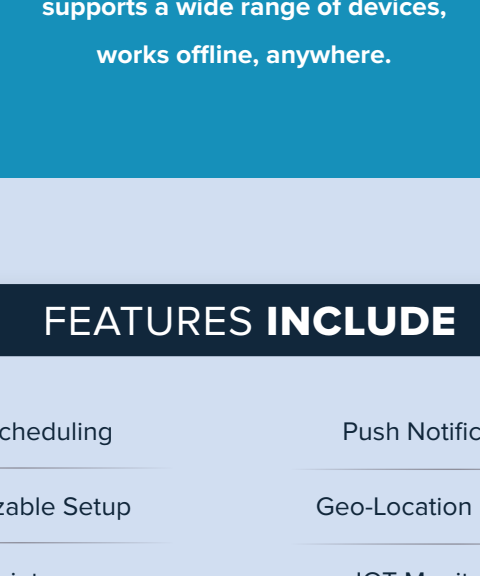

ADMIN CUSTOMISABLE CHECKLISTS

Add Checks, Remove Checks, set your check specific photograph and comment requirements within seconds

DEDICATED & SUPPORTED MOBILE APP

Easy to use,
supports a wide range of devices,
works offline, anywhere.
