

LIFE SAFETY VENDOR FOR ALL YOUR NEEDS

NATIONWIDE SECURITY CORPORATION

Engineered Life Safety Systems

Nationwide Security Corporation provides the most reliable Engineered Life Safety Systems which ensures your organization is protected during any emergency. Fire Alarm Systems provide early detection to protect your organization during a fire event. NSC has the most advance offering of detection technologies for all your protection needs. Mass Notification Systems provide information to your organization during fire, weather, security, and other emergency events. Distributed Recipient Mass Notification systems offer a variety of ways to ensure messaging gets to members of your organization. These systems can include indoor and outdoor voice communication, electronic signs, text messages, and email. NSC provides central station service to guarantee 24-hour protection of your facilities. Our connected systems can be monitored from any location using a mobile application.

NSC also provides In Building Communication for first responders. Bi-directional amplifiers (BDA) and distributed antenna systems (DAS) ensure first responders have in-building radio coverage they need during emergency situations.

For national accounts NSC has a network of certified and qualified integrators across the nation to support and service all your life safety needs. This partnership provides consistency in design, products, quality, and pricing. This also allows all your life safety systems to be monitored and managed by the same application.
