

## TWO POWERFUL WAYS MANUFACTURERS ARE LEVERAGING NATIONWIDE SECURITY CORPORATION'S NATIONAL ACCOUNTS TEAM

Some manufacturers, both inside and outside of the security industry, require a physical security element as part of their overall manufactured product. Here are two ways manufacturers are working with Nationwide Security on a national level.

### SUPPLIER SCENARIO

Perhaps you manufacture and sell directly to museums a vibration and movement detector for paintings and display cases. The equipment needs to be installed on site, but you don't want to leave that up to the museums and you don't want to spend the time to find good security integrators everywhere to do the work. We can be your **'Boots on the Ground'** to install your product everywhere you sell it.

### CLIENT SCENARIO

Perhaps you manufacture mobile data centers that are delivered all over the country. You know some form of physical security should be included in the design and manufacturing process, but you don't have the in-house expertise to know what products are best for the application or how to install and program them properly. Not only can we design and install the systems, we can service and monitor them once they are on site.

NSC understands every scenario is different with its own unique scope. Nationwide Security Corporation has the answer by offering turnkey installation, service, and monitoring solutions to manufacturers both inside and outside of the security industry on a national basis.

#### The advantage of using NSC for these services include:

- Only one phone number to call for all of your security installation, servicing, and monitoring needs, no matter what or where the needs are.
- Ability to perform these services anywhere in the country and many places internationally including multiple locations at one time.
- Centralized control of your systems for consistency of operation and performance.

NSC DOES NOT TAKE A COOKIE-CUTTER APPROACH TO SECURITY SERVICES. NO TWO CLIENTS ARE THE SAME AND WE WILL ADAPT TO WHATEVER YOUR PARTICULAR MANUFACTURING NEEDS ARE.
