

SECURITY SOLUTIONS FOR MANUFACTURING OPERATIONS

NATIONWIDE SECURITY CORPORATION

Protecting Your Operations, Employees and Products

Manufacturing companies have a lot to consider when it comes to physical security. Not only do they have to think about protecting the people working in the facility and the products that they are producing but also their customer and employee information, financial records, product information/trade secrets, and much more. Nationwide Security Corporation's manufacturing security solutions help integrate intrusion, fire, access control, turnstiles, intercoms, and surveillance in a single system.
