You may see an option to view a Claims Snapshot. The Claims Snapshot compares your health plan options based on your past health care usage (your claims). Only employees that meet certain criteria will view this option.

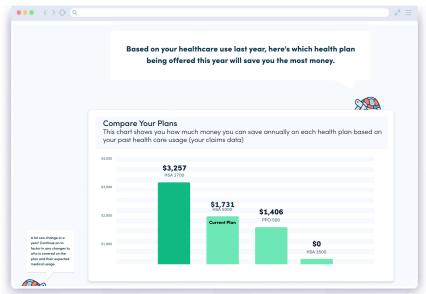

Enter your subscriber ID to see a report comparing your health plan options based on your past health care usage (your claims).

Your subscriber ID is your health insurance ID number, also known as your member ID, located on your health insurance card.

2 View your claims snapshot! Based on your past health care usage, this chart shows you which of your plan options will save you the most money next year.

How we calculate this: Based on your health insurance claims, we calculate the total cost of each health plan, then rank them in order of savings. Total costs include your annual premium plus estimated out-of-pocket costs, minus any employer HSA/HRA contributions.

3 What's next?

- **A.** If your health needs are NOT changing next year, download your report then navigate to your enrollment platform and choose the highest savings plan.
- B. If your health needs WILL likely change (which is probable!), answer some questions on the next few pages and receive an upto-date report.
