

Business Resilience

An Ecosystem Approach

Identify Gaps. Reduce Risks. Succeed.

The growing complexity of IT systems has increasingly outpaced the supply of qualified service professionals needed to build, customize, and manage them. The traditional models for delivering these services have resulted in organizations spending more time managing a multitude of vendors while sacrificing quality and budget.

Many organizations are realizing that not only do they need a more robust group of technical service providers to support their ad hoc projects, day-to-day operations, and future business needs – they also need someone who can help manage and streamline the selection and implementation process.

MOXFIVE can help. Our Technical Advisors are on the front lines helping companies restore IT operations and recover following a variety of cyber incidents every day. Our unique ability to connect the dots between business, IT, and security objectives helps us understand how to quickly identify gaps and build more resilient business environments.

Business Resilience

With front line experience responding to incidents daily, MOXFIVE Technical Advisors have the unique ability to connect the dots between business, information technology, and security objectives to help you quickly identify the gaps and build a more resilient environment.

Working with MOXFIVE Technical Advisors provides the following benefits:

Access to Experts at Scale

MOXFIVE continually curates its ecosystem of the industry's best technology experts and service providers so that we can quickly assemble the right team or technology based on what your organization needs.

Faster Procurement

MOXFIVE maintains contractual relationships with our partner ecosystem to facilitate a faster and more efficient procurement process for our clients.

Smoother Implementation

MOXFIVE Technical Advisors can help manage the implementation process to keep projects on schedule and minimize disruption to day-to-day activities.

Resilient Outcomes

MOXFIVE provides advisory and implementation services to address the business process and technology requirements needed to build resilient security operations.

Build Resilient Outcomes with MOXFIVE

At MOXFIVE, we pride ourselves on providing organizations a tailored approach based on their needs. By combining our technical expertise with the business lens, we are able to provide value unlike others. We understand that IT and cybersecurity are critical to business operations and decisions need to be made with the impact each decision has on the business in mind. MOXFIVE provides the following Business Resilience offerings:

Advisory Services

IT & Security Strategy

Leverage MOXFIVE Technical Advisors to support the development and execution of IT and security initiatives.

Security Services

MOXFIVE Technical Advisors assist with developing a tailored security program and finding the right solutions for your organization.

Retainer Services

Establish an ongoing relationship with MOXFIVE Technical Advisors as your go-to knowledge center on emerging trends and thought leadership to keep your organization moving forward on IT and Security initiatives.

IT Infrastructure

Asset Management

Track and assess IT inventory to optimize procurement decisions and incident response efforts.

Cloud Services

Develop and execute migration and/or optimization of cloud service provider solutions, e.g. Amazon (AWS), Microsoft 0365/Azure, Google Cloud.

Backup Infrastructure Storage

Implement and manage robust backup solutions designed to minimize downtime.
Deploy and/or optimize data storage infrastructure.

Managed Services

IT Services

Deploy, manage, and support IT networks including critical systems, servers, and workstations.

Security Services

Deploy and monitor security technology stack and MDR.

Security Awareness Training

Phishing exercises and modular education programs for staff.

Dark Web Monitoring

Ongoing monitoring for critical information, stolen credentials, and threats targeting your organization.

Security

Multifactor Authentication

Protect unauthorized access with enhanced authentication.

MSSP/MDR

Deploy and monitor security technology stack.

Endpoint Technology

Deploy endpoint protection, detection, and response platforms.

Segmentation

Optimize security with network segmentation solutions.

Assessments

Analyze health of existing security via penetration testing; vulnerability application and compromise assessments; or M&A due diligence.

MOXFIVE is a specialized technical advisory firm founded to help minimize the business impact of cyber attacks. Over the last decade, our team of experts has helped thousands of businesses respond to major incidents and saw firsthand that there needed to be a better way for organizations to get the technical expertise they need when they need it most. With deep roots in incident response and corporate IT, MOXFIVE Technical Advisors strive to be the go-to technical resource for our clients - helping organizations of all types solve their most challenging technology-related problems and provide technical expertise at scale.
