

Incident Response

A New Response Strategy

Smoother Response. Faster Recovery. Reduced Costs.

As business operations become more entwined with data and technology, cyber attacks are becoming more complex and disruptive to organizations' operations. This evolution has caused a shift in priorities during the incident response process. While privacy and legal concerns remain important, today's priorities are more often focused on IT and the need to get critical business operations up and running after an attack.

Many victims today find that they either don't have a response strategy - or are forming one for the first time. As a result, organizations need a Technical Advisor they can turn to from the start who has a proven playbook for leading incident response efforts and who can be the source of truth about what is needed to respond with speed and precision.

At MOXFIVE, our goal is to be that first resource for any organization facing an incident – providing the technical insight to put our clients on the right path from day one. Our Technical Advisors have managed and led many of the most significant security investigations in the world and can quickly assess any situation to determine the most efficient and cost-effective technical response strategy.

The MOXFIVE Platform

MOXFIVE's platform approach to incident response introduces scale to the IR customer experience by focusing on speed and efficiency. Our Technical Advisors will work with your team to clearly define the incident and develop the most effective response strategy. Once a plan is in place, they will work in tandem with a MOXFIVE Incident Manager to build the team of experts needed and manage all incident response efforts through to completion.

Working with MOXFIVE provides the following benefits:

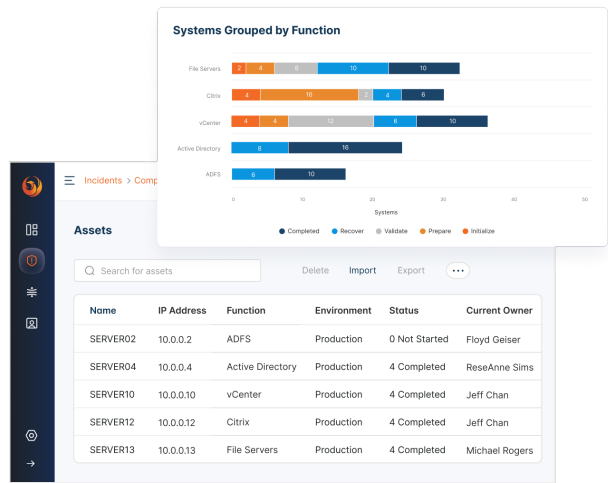

Smoother Process

Proven Incident Management Playbook

Our Technical Advisors have managed and led many of the most prominent security investigations in the world and can quickly assess any situation to determine the most efficient and cost-effective technical response strategy.

Seamless Execution

Each engagement has a dedicated MOXFIVE Incident Manager who will organize the many teams, workflows, and communications required to keep projects on track and moving along efficiently..

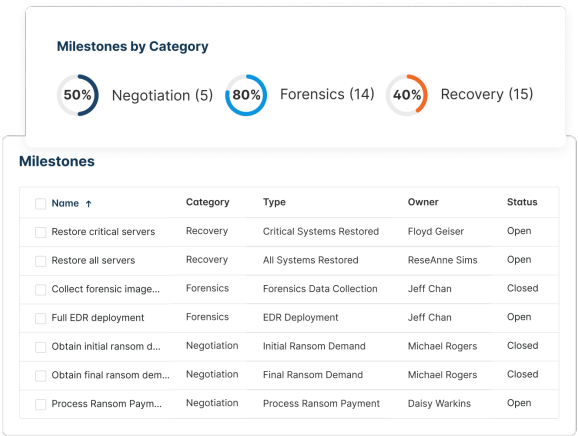

Increased Visibility

Simple Unified View

The MOXFIVE Platform builds a comprehensive timeline of an attack so you can easily see, understand, and discuss what happened across multiple response teams.

Identify Gaps and Build Resilience

Having a unified timeline can help teams better analyze what worked and what didn't so you can evaluate where improvements need to be made across processes, technologies, and teams.

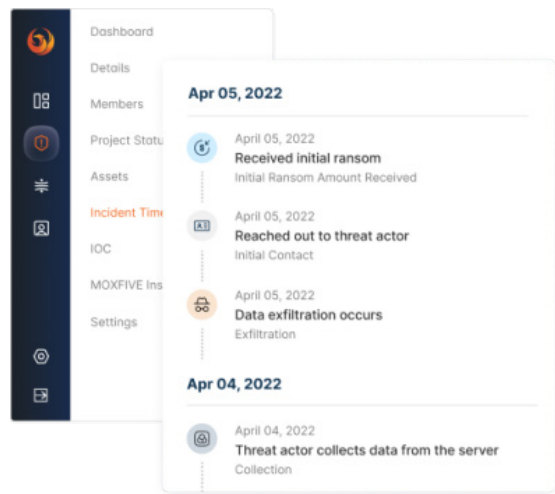

Faster Response

Real-time Status and Progress Updates

Our MOXFIVE Platform streamlines the incident response process by providing a centralized view of key milestones and project details. MOXFIVE provides clarity and peace of mind needed for attack victims during the incident response process.

Technical Expertise at Scale

The MOXFIVE Platform combined with our extensive Partner Ecosystem improves the client experience with its ability to quickly scale to meet the demand for incident response services and deliver the expanded expertise, technologies, and resources clients need in the wake of a cyber-attack.

MOXFIVE is a cybersecurity company helping organizations respond to incidents and minimize the risk of future attacks. Over the last decade, our team of experts has helped thousands of businesses respond to major incidents and saw firsthand that there needed to be a better way for organizations to get the technical expertise they need when they need it most. Through a combination of our technical experts and proprietary platform, we bring order to chaos and deliver a tailored incident response approach and resilience-minded path forward for clients of all sizes, faster and more efficiently.
