

# WE GET ACCESS TO OUTCOME-BASED TECHNICAL SOLUTIONS.

Support Stacks for K-12 Needs

## Keep your Google Workspace for Education domain running effectively and efficiently.

As technology becomes essential to the advancement of the education industry, IT departments are focusing on the operation and security of their institutions' Google Workspace for Education domains. CDW Amplified™ services dissolve the need to expend invaluable time and resources researching, learning, testing and implementing technical solutions without guidance from qualified experts.

**Support Stacks** are brief and predefined engagements with our Google IT specialists, designed to equip institutions with clear deliverables that solve common domain challenges. Offered stacks include:

SUPPORT STACK	DELIVERABLE
<a href="#">Storage Insights</a>	Discover how file storage is used within your Google Workspace for Education tenant, and determine current total usage, top users and top storage use cases to plan for future controls over usage that best fit educational purposes.
<a href="#">OU Restructure</a>	Analyze the current OU structure, receive a recommendation for OU structure changes and complete an OU restructure, including moving users as needed, for your domain.
<a href="#">GAM: Getting Started</a>	Perform bulk actions, access data and create automated Google Workspace for Education workflows with a command-line tool.
<a href="#">Google Voice Numbers Cleanup</a>	Identify and remove unassigned Google Voice numbers to avoid incurring additional billing costs.
<a href="#">Gmail Security</a>	Optimize Gmail settings to improve issues with usability and security for your institution's emails.
<a href="#">Gmail for Students</a>	Control who students can send emails to and receive emails from (internally and externally) using a Walled Garden approach, and maintain safe and effective communication by as regulating the content within those emails.
<a href="#">BigQuery: Getting Started</a>	Export Google Workspace log and usage reports into Google BigQuery (for Standard and Plus editions ONLY).
<a href="#">Vault Setup &amp; Best Practices</a>	Configure Google Vault to meet retention and e-discovery compliance regulations by reviewing policies and holds, learning Vault best practices and exploring use cases.
<a href="#">Shared Drives Insights</a>	Acquire usage data concerning management, users and files on shared drives in a Google Workspace domain to determine the best course of action for any necessary cleanup.
<a href="#">Implementing Two-Step Verification</a>	Receive guidance on activating two-step verification and developing an account recovery process.
<a href="#">Chrome Configuration</a>	Learn how to better manage Chromebook and Chrome device setup, policies, usage and cleanup.
<a href="#">Workspace Plus Tuneup</a>	Catch up on the recently launched Google Workspace for Education updates you may have missed and get help reconfiguring your Google Admin console.
<a href="#">Admin Reports 101</a>	Leverage audit logs and create alerts to better monitor, secure and understand the activity happening in your Google Admin console.
<a href="#">Groups Cleanup</a>	Review Google Groups for Business existing groups and individual group settings, use cases, and limitations.
<a href="#">Introduction to Chromebook Management</a>	Manage Chromebooks more effectively with these fundamental policy and configuration concepts, and best practices.
<a href="#">Third-Party API Access</a>	Receive an API usage dashboard to analyze third-party access to your Google domain and planning tools, for implementing better restrictions.
<a href="#">Classroom Cleanup</a>	Use Little SIS for Google Classroom and GAM to help with the bulk cleanup of active classes, as relates to unattended students, creating permissions and restrictions, and more.
<a href="#">Drive Trust Rules: Getting Started</a> <b>NEW!</b>	Receive an overview of how Trust rules work and what use cases are possible can help your team make decisions going forward on what rules to implement.
<a href="#">Marketplace Apps and Extensions</a> <b>NEW!</b>	Discover the differences between Marketplace Apps, Add ons, SAML Apps, Mobile Apps, Chrome Apps, Android Play Apps, and Chrome Extensions within Google's terminology.
<a href="#">DLP Setup &amp; Best Practices</a> <b>NEW!</b>	Review how to configure custom Data Loss Prevention detectors to use in combination with Google's built-in detectors within Data Loss Prevention rules to reduce the overall number of false positives for given educational situations such as IEPs, 504s, or objectionable content detection.
