Drew Technologies

RAP®2 is here!

The next generation of RAP® is here, and it's more capable than ever!

Drew Technologies is the industry leader in vehicle reprogramming; and we understand that J2534 programming can be a difficult task. In 2016, we revolutionized the automotive aftermarket industry with the introduction of our **Remote Assist Program** (**RAP®**). Our **RAP®** team has remotely assisted automotive repair & collision technicians, successfully programming thousands of Asian and domestic vehicles!

RAP®2 expands your technician's capabilities to include European vehicles with the same easy-to-use process! Additionally, pre/post scan and remote diagnostic capabilities will be added to **RAP®2** in the future.

So, if you're an Automotive Repair or Collision Shop, or if you're a Technician, **RAP®2** is the solution for you!

- Finish the job correctly
- Keep the vehicle in your shop
- Increase profits
- Increase customer satisfaction

Supported Brands

RAP®2 continues to support these brands:

- BMW
- Chrysler
- Ford
- GM
- Honda/Acura
- Hyundai
- Kia
- Mercedes-Benz
- Nissan
- Toyota/Lexus/Scion

Drew Technologies

SAME RELIABILITY WITH
MORE CAPABILITY!

How does it work?

It's as simple as 1... 2... 3...!

1. **Give us a call to be scheduled**

2. **Plug in the RAP® kit**

3. **Power up the RAP® kit**

⚡ **We flash the car!**

Drew Technologies guarantees success. Enjoy the peace of mind and customer satisfaction, knowing the vehicle has been successfully programmed!

Flash Availability Check (Prices in USD)

For $40, we can check to see if a flash is available for your particular vehicle. If it's determined that an update does exist for your vehicle—and if you allow our **RAP®** Technicians to do the flash—we will apply that $40 toward the $125 flash fee!

Design

RAP®2 was designed and developed as a true turn-key remote solution that can be used by any technician or shop, regardless of experience.

The **RAP®2** kit includes:

- **Windows Tablet PC**
- **An additional hard drive to allow for future expansion as new OE's are added**
- **J2534 device**
- Wireless for most makes
- **Diagnostic Network Subscription** is included with **RAP®2**
- OEM subscriptions
- **90–amp battery maintainer capable of handling European amperage requirements**
