## DriveRAP - Remote Assist Program

Whether you're an Automotive Repair Specialist, Collision Workshop or a Technician, we understand that J2534 Programming can be a difficult task, but OpusIVS have the solution.

## DriveRAP Remote Assist Program

INTELLIGENT VEHICLE SUPPORT >> REPAIRING THE MOST COMPLEX VEHICLES FAST

Remote Assist Programming (RAP) is a new service from Opus IVS for Europe, that enables users of **DrivePro** to program and code ECUs using the most up to date data from OEMs by connecting directly with our Remote Technicians in our support centres

With our expert technical support team assisting you remotely, you can guarantee success as we take control of your device and do the job for you, enabling you to focus on what's important

### Vehicle brands covered:

Ford*	Vauxhall*
Citroen*	Opel*
DS*	Volvo**

**MORE BRANDS COMING SOON!**

Visit [opusivs.com](https://opusivs.com) for full ECU coverage details

## The benefits

PAYG – only pay for it when you need it!

No need to sign up, install or use the VM Pass-Thru application.

Book in complex programming jobs with confidence – no need to refer to a dealership or call in specialist help.

Cost effective and self-funding pricing model which generates additional revenue for your workshop.

Increases workshop efficiency – an Opus IVS Master Technician takes over and completes the job for you!

Removes the need for expert in-house programming knowledge per VM brand.

Fully controlled by Opus IVS Master Technicians - reducing the possibility of programming failures.

Pre and post programming checks enabling a complete end-to-end solution.

The Opus IVS Remote Assist Program has been designed with simplicity in mind.

Whether a repair requires Control Unit Reprogramming, Variant Coding or a complex OEM diagnostic procedure, our technicians will take remote control of your **DrivePro** and complete the reprogramming procedure for you. It is as simple as plugging in the equipment to a vehicle, giving us a call and then letting us do the rest.

## How it works

**1** Access DriveRAP from the **DrivePro** device home screen.

**2** Contact IV 360 using the dedicated contact details for DriveRAP (+44 (0) 1865 870050) and book a slot for your programming session.

**3** Payment is made by credit card for the programming session.

**4** A DriveRAP Master Technician will contact you and begin pre-programming checks, including confirmation of availability of a suitable BSU. (Battery Support Unit).

**5** The DriveRAP Master Technician will check the vehicle for available software updates and provide you with a results report.

**6** A Programming session is confirmed and initiated by the DriveRAP Master Technician.

**7** Post programming checks are carried out, including a full read/clear of all DTCs (Diagnostic Trouble Codes).

**8** Once your DriveRAP session is complete, you will receive a full update from your DriveRAP Technician.

(Chargeable per event)  
**DriveRAP Service Charge**

**£95**

### Please note the following:

- DriveRAP is an optional service and is charged per programming event.
- Additional DriveRAP fees apply with Volvo programming events.
