

APPLYING INSIGHTS TO PROGRAM DATA

ResourceX OnlinePBB Tools

CREATE A PROGRAM INVENTORY

This initial and invaluable step creates the backbone of all future data layers and is the platform on which you can apply Insights to take action.

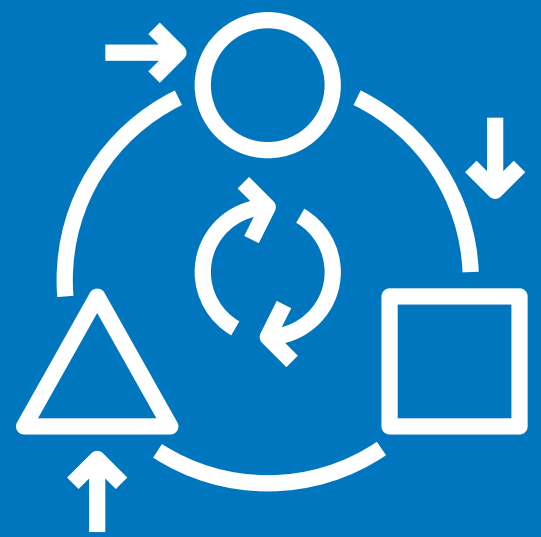

EVERY PROGRAM HAS A FUTURE

Tag each program with an opportunity that aids in the achievement of your set goals and priorities.

DETERMINE COMPLEXITY OF TAKING ACTION

Knowing an opportunity exists is an important piece of data, and outlining the steps required to take action on that opportunity is crucial. Identify level of complexity and timeline to create a richer data set of Insights.

ASSOCIATE THE FINANCIAL IMPACT

Each Insight created can be further described by adding the OnGoing and One-Time Revenue and Expense impacts.
