

CitiusTech: Cloud Practice

CitiusTech Cloud Practice helps large healthcare organizations define and implement rapidly evolving cloud technologies to transform the way technology is used to support patient care in a secure, scalable and cost effective manner.

Migration to the Cloud - Opportunities and Challenges for Healthcare Organizations

Healthcare organizations are under tremendous pressure to reduce IT costs, and at the same time there is a crucial need to use state-of-the-art technology solutions for providing better healthcare services. Cloud technologies can help healthcare organizations promote exchange of clinical and financial information across stakeholders, enhance reliability and scalability of applications and provide better data security.

CitiusTech Cloud Practice: Overview

CitiusTech Cloud Practice team works with healthcare organizations to define their cloud roadmap, identify their cloud and security readiness, and migrate to cloud in a phased manner. CitiusTech's Cloud Practice has an array of certified healthcare cloud professionals who have deep expertise across public and private cloud technologies. Our team is experienced in leveraging best practices to provide solutions which are scalable, robust, security standards-compliant and cost-effective. The team helps organizations rationalize and migrate to cloud and leverages our solutions to enable businesses to accelerate transformation.

Cloud Practice - Key Capabilities

- Cloud discovery and assessment framework to determine healthcare organizations' cloud readiness and define cloud adoption strategy (including cost/ benefit analysis)
- Best practice architecture for building cloud-native enterprise applications
- Security and risk analysis framework to manage healthcare organizations' security, compliance and governance
