

CitiusTech Integrated Cloud Suite (ICS)

ICS: Optimize Your Hybrid and Multi-Cloud Environment

In today's multi-cloud world, healthcare organizations need to leverage disparate cloud platforms, vendors and infrastructure. The complexity of hybrid or multi-cloud environments limits their ability to scale, implement uniform practices and generate the best possible outcomes in terms of performance, availability, utilization and returns on investment.

CitiusTech's Integrated Cloud Suite (ICS) is a one-stop solution that enables healthcare organizations to reduce complexity and drive a multi-cloud strategy cost-effectively. It offers a unified platform to manage all siloed cloud subscriptions across the enterprise, mitigating risks and impact on the business.

ICS brings a variety of cloud management resources under a single umbrella and streamlines the management of multiple cloud service providers.

ICS: Benefits

- **Unified monitoring** of all resources - applications, platforms and infrastructure - across the cloud spectrum
- Ability to discover and act on **cost optimization opportunities** through integrated dashboards
- **Simplified provisioning and management** of cloud resources through a structured approach to **cloud governance**
- Access to CitiusTech's large team of **healthcare domain experts**

CitiusTech Healthcare Cloud Services: Highlights

Significant experience in building and migrating (Lift & Shift) large enterprise healthcare applications to the cloud

Pool of cloud experts with a deep understanding of cloud transformation, platform set up, QA and managed services

Strong partner relationships with Microsoft Azure, AWS, Google Cloud and IBM - across healthcare cloud consulting and engineering

Robust consulting framework - cloud assessment templates, platform benchmarking, ROI calculator, cost - benefit analysis, compliance review
