## Who Should Attend

Executive Leadership & Decision Makers (CXOs, Data Management & Technology Leaders)

# FAST+

## Accelerated FHIR® Deployment and CMS compliance

CitiusTech's FAST+ is an end-to-end FHIR based solution for healthcare organizations to comply with CMS Interoperability & Patient Access Rule, specifically addressing the **Patient Access API, Provider directory API and Payer to Payer Data Exchange**. FAST+ has pre-built features for expedited implementation, Identity Access Management & Consent Management ensuring secured access of data, and flexible implementation support both on-cloud and on-premise. FAST+ enables payer organizations to:

- Build and manage FHIR-based API infrastructure
- Enable multi-device access to claims, encounter and cost information
- Aggregate and leverage data across organizational silos
- Provide members real-time access to their data using FHIR standards
- Give members control over sharing their data with consent management
- FAST+ designed for both onsite and cloud based deployments
