

## PERFORM+ Provider Performance Management

### Unified platform to set-up value based arrangements and drive provider performance

The healthcare industry is rapidly shifting to value-based care, driving the need for advancing population health management, regulatory compliance and operational processes. Organizations need a holistic approach to performance improvement that ensures better alignment between payers and provider groups.

CitiusTech's **PERFORM+** is an **end-to-end provider performance improvement solution** that provides health plans a single platform to set up value-based arrangements and drive provider performance in an aligned and collaborative method. It comes with a library of pre-built metrics for **easy creation, management and monitoring of diverse value-based programs**.

It also leverages **AI & Data Science models** to aid decision making for value-based programs with recommended benchmarks, targets and compensation.

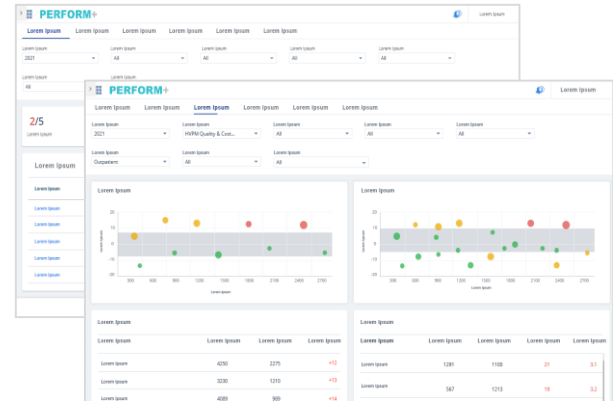

With PERFORM+, providers get **powerful self-service features** which enable them to manage their own gaps, get better visibility within processes, and ensure better alignment to strategic, quality, value, and cost-based initiatives.

### PERFORM+ Highlights

- 700+ pre-built measures for easy selection and modification
- Highly configurable approach for setting up a wide variety of programs
- Provider performance and incentive scorecards to align networks and programs
- Self-service capability for providers to manage administrative activities and take charge of their performance

## PERFORM+: Key Advantages

- Configure programs and reports with ease for various contractual arrangements, as per your business needs
- Leverage centralized platform for unified visibility into provider performance across various initiatives including regulatory, financial, and operational ones
- Simplify metric selection and compensation definitions, for focused target assignments
- Get actionable insights to drive collaboration and improve performance, and give provider seamless access to their performance data
- Improve the speed-to-market of new value-based arrangements
