

SECURITY ASSESSMENTS

All businesses have security risks. Know where you stand.

Are your existing security measures functioning the way you need? Are they appropriate for the function and business criticality of your facility? Are they adequate to meet your current and future needs? Don't wait until after an incident to assess your security measures.

Know where you stand. Independent assessment – Fresh view, different perspective than in-house

Athos security experts have conducted security assessments around the world. These have included office buildings, critical energy infrastructure sites, manufacturing plants, construction sites, convention centers, hotels, sports/entertainment arenas, and private residences.

Athos will conduct an on-site inspection of your facility, review past events and current threat trends, review your security policies, systems, equipment, and access control. We will provide you with a complete report of our findings, analysis and prioritized, risk based recommendations to improve the safety and security of your facility.
